Abstracts

Peregrine Pharmaceuticals Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Peregrine Pharmaceuticals Inc. and its competitors. This provides our Clients with a clear understanding of Peregrine Pharmaceuticals Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Peregrine Pharmaceuticals Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Peregrine Pharmaceuticals Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Peregrine Pharmaceuticals Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Peregrine Pharmaceuticals Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Peregrine Pharmaceuticals Inc. business.

About Peregrine Pharmaceuticals Inc.

Peregrine Pharmaceuticals, Inc., a clinical-stage biopharmaceutical company, engages in the development of monoclonal antibodies for the treatment of cancer and viral infections.

The company is advancing its two Phase II oncology platforms, as well as its phase I chronic hepatitis C virus (HCV) program. Its pipeline of novel investigational monoclonal antibodies includes bavituximab and Cotara. The company's wholly-owned biomanufacturing subsidiary, Avid Bioservices, Inc. (Avid), provides integrated current good manufacturing practices (cGMP) commercial and clinical manufacturing services for the company and third-party clients.

PRODUCTS IN CLINICAL STAGE DEVELOPMENT

Oncology Franchise

Bavituximab for the Treatment of Solid Tumors

Bavituximab is a phosphatidylserine (PS)-targeting monoclonal antibody that represents

a new approach to treating. Baviximab may be used for the treatment of multiple cancers in combination with prescribed chemotherapeutic drugs. Its monoclonal antibody has a mechanism of action that targets PS exposed on tumor vasculature. The company initiated a randomized Phase IIb trial evaluating baviximab in combination with docetaxel for the treatment of refractory non-small cell lung cancer (NSCLC) patients. It also initiated a second randomized Phase IIb trial evaluating baviximab in combination with paclitaxel/carboplatin for the treatment of front-line NSCLC patients. In addition, the company has three ongoing Phase II clinical trials in front-line NSCLC, front-line advanced breast cancer, and refractory advanced breast cancer which are evaluating baviximab in combination with standard chemotherapy regimens. The company has completed its Phase I study using baviximab as a monotherapy in patients with advanced solid tumor malignancies.

Cotara for the Treatment of Brain Cancer

The company's brain cancer therapy Cotara is a targeted monoclonal antibody linked to a radioisotope that is administered directly into the tumor, destroying the tumor from the inside out, with minimal exposure to healthy tissue. Cotara is an agent based on its tumor necrosis therapy (TNT) technology platform. Cotara is a monoclonal antibody targeting agent conjugated to Iodine 131, a therapeutic radioisotope that kills cells near the site of localization. It is evaluating Cotara in an ongoing Phase II clinical trial in patients with recurrent glioblastoma multiforme (GBM), the deadliest form of brain cancer.

Antiviral Franchise

Baviximab for the Treatment of HCV Infection

The company is conducting an ongoing Phase Ib trial of baviximab as a monotherapy for patients co-infected with hepatitis C virus (HCV) and human immunodeficiency virus (HIV). This open-label, dose escalation study was designed to assess the safety and pharmacokinetics of baviximab in up to 24 patients chronically infected with HCV and HIV.

In-Licensing Collaborations

PS-Targeting Program (baviximab): The company has in-licensed the worldwide rights to the PS-targeting technology platform from the University of Texas Southwestern Medical Center at Dallas (UTSWMC), including baviximab. It entered into a license

agreement with Genentech, Inc. to license certain intellectual property rights covering methods and processes for producing antibodies used in connection with the development of its PS-targeting program. It also entered into a commercial license agreement with Avanir Pharmaceuticals, Inc., (Avanir) covering the generation of the chimeric monoclonal antibody, bavituximab. The company entered into a worldwide license agreement with Lonza Biologics (Lonza) for intellectual property and materials relating to the expression of recombinant monoclonal antibodies for use in the manufacture of bavituximab.

Tumor Necrosis Therapy (Cotara): The company has entered into a worldwide non-exclusive license agreement with Lonza for intellectual property and materials relating to the expression of recombinant monoclonal antibodies for use in the manufacture of Cotara.

Out-Licensing Collaborations

The company entered into a licensing agreement with Merck KGaA to out-license a segment of its TNT technology for use in the application of cytokine fusion proteins.

CONTRACT MANUFACTURING SERVICES

Avid provides an array of contract biomanufacturing services, including contract manufacturing of antibodies, recombinant proteins and enzymes; cell culture development; process development; and testing of biologics for biopharmaceutical, and biotechnology companies. Avid's cGMP manufacturing operations includes the following four bioreactors: two 1,000 liter, a 300 liter, and a 100 liter. Avid also maintains spinner flasks and bioreactors in its process development laboratory ranging from 1 to 100 liter. Avid provides an array of services for the company, as well as working with various companies in the biotechnology and pharmaceutical industries.

Avid's services include cell banking, stability testing, clinical and commercial product manufacturing and purification, bulk packaging, final product filling and regulatory strategy, submission and support. Avid also provides various process development activities, including cell line optimization, analytical method development, and product characterization.

Suppliers

The company's radiolabeling supplier is Iso-tex Diagnostics, Inc.

History

Peregrine Pharmaceuticals, Inc. was founded in 1981.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
