About Pharmaniaga Bhd

Pharmaniaga Berhad operates as an investment holding company that manufactures generic pharmaceuticals in Malaysia. The principal activities of the group consist of research and development, manufacturing, marketing, distribution and trading of pharmaceutical products; purchasing, storage and distribution of pharmaceutical and medical products to government hospitals and private institutions; provision of information technology solutions and systems support services; provision of diagnostic laboratory testing services; and medical planning and hospital equipping activities.

Products

In 2004, the company launched products, such as Innoherb, a health supplement range from France; Ticlopidine, which reduces the probability of future stroke events in stroke patients; Clarithromycin Suspension, an antibiotic for treatment of bacterial infections in children; Itraconazole, for the treatment of fungal infections and Paracetamol C&F (Cold and Flu), which is a remedy for colds and flu. A total of 20 products, were registered in 2004.

The acquisition of 55 per cent interest in PT Millennium Pharmacon International Tbk (MPI) in Indonesia was completed in December 2004. MPI is the distributor of

pharmaceutical and healthcare related products for local and foreign principals in Indonesia. Some of MPI's major principals include Merck, Meiji Indonesia and Lapi Laboratories. MPI had a nationwide distribution network of 24 branches as of December 31, 2004. The main warehouses are located in three cities; namely Jakarta, Bandung and Surabaya, all are located in Java Island.

Medical Products and Services involves in the business of providing hospital equipping services, as well as procuring and distributing medical and related hospital equipment.

On the local front, the company kicked off the pilot project for the Integrated Hospital Inventory System, extending the existing computerized system to cover areas, such as the main store, ward supply pharmacy, satellite store and ward unit within government hospitals.

The company signed up a contract with a major private hospital group in Thailand for the development and implementation of the Internet based Demand Chain Management (DCM) system. The system to be implemented in Thailand would model after its Pharma Net set up in Malaysia.

The company offers Computer Disaster Recovery Plan (CDRP) for UEM World Berhad (UEM World) which addresses the recovery of UEM World's mission critical processing operations in the event of a disaster. Kualiti Alam Sdn Bhd, a subsidiary company of UEM World, has appointed the company as their consultant in developing their CDRP integrated Waste Management Centre in Bukit Pelanduk, Negeri Sembilan. Other parties have also expressed interest in Pharmaniaga Solutions' capabilities in the area of Business Continuity Planning, in particular. The company's subsidiaries are Pharmaniaga Manufacturing and Pharmaniaga Logistics.

Strategic Alliance

The company has strategic alliances with local research institutions, such as the Malaysian Institute for Nuclear Technology; MARDI; and the National Institute for Natural Products, Vaccines and Biologicals in the field of biotechnology.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
