Abstracts

Philex Mining Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Philex Mining Corp. and its competitors. This provides our Clients with a clear understanding of Philex Mining Corp. position in the [Metals and Mining](#) Industry.

The report contains detailed information about Philex Mining Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Philex Mining Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Philex Mining Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Philex Mining Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Philex Mining Corp. business.

About Philex Mining Corp.

Philex Mining Corporation (the company) was incorporated in the Philippines in 1955 to engage primarily in mining activities. The Company's 81.1%-owned gold subsidiary is Philex Gold Inc.

The Company has operated for 45 years the Sto. Tomas II copper-gold-silver deposit at Padcal, Tuba, province of Benguet. The Padcal mine is the first block cave operation in the Far East. Total ore mined to year-end 2002 was 278.9 million tonnes, with a metal production of 788.3 million kilograms (1.7 billion pounds) of copper in concentrate, and 141.9 million grams (4.6 million ounces) of gold and 157.6 million grams (5.0 million ounces) of silver in concentrate and bullion form. The Padcal mine is the only remaining copper-gold operation in the Philippines. Philex Gold operated the Bulawan mine in the province of Negros Occidental up to the second quarter of 2002.

PADCAL OPERATIONS

Mining Operations

The tonnage mined for the year in review was 7,861,455 metric tones, 9.4% higher compared to last year on account of the improved performance of the cable belt

conveyor and higher availability of the load-haul-dump (LHD) equipment.

Concentrator Operations

The mill treated 7,863,087 tones of ore, 8% higher than last year's throughput, producing 79,213 tones of concentrate material containing 19.2 million kilograms copper, 3.9 million grams gold and 3.9 million grams silver.

PHILEX GOLD PHILIPPINES, INC.

Bulawan Operations

The Bulawan operations was decommissioned on May 1, 2002. Production for the four months of 2002 was 14,734 equivalent ounces of gold from 211,316 tones of ore milled during the period. The Bulawan operations began commercial operation in January 1996 and over its lifetime produced a total of 465,766 equivalent ounces of gold.

Boyongan Project

The Boyongan project is a joint venture entered into in 1999 between Philex Gold and Anglo American Exploration (Philippines) BV, a wholly owned subsidiary of Anglo American plc, administered through a jointly-held company, Silangan Mindanao Mining Co., Inc. The project covers 25,184 hectares within the historic Surigao gold district.

Anglo is directing the exploration program and by 2001 has earned a 40% interest in the project. In March 2002, Anglo purchased from Philex an additional 10% interest in the project, resulting in an equal 50% ownership for each. If Anglo brings the project through a bankable feasibility study at its sole expense, it will be entitled to an additional 30% interest, either directly or through a joint venture with a qualified entity, and will conduct the operations if the project proceeds to development.

Significant Events

Acquisitions

In October 2008, the company has approved the acquisition of a 50% interest over the Boyongan copper-gold porphyry property from Anglo American Exploration (Philippines) BV. This acquisition would give the Philex group full control over the property together with Philex Gold Philippines Inc.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
