## **Abstracts**

Pinnacle Data Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Pinnacle Data Systems Inc. and its competitors. This provides our Clients with a clear understanding of Pinnacle Data Systems Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Pinnacle Data Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Pinnacle Data Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Pinnacle Data Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Pinnacle Data Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pinnacle Data Systems Inc. business.

### **About Pinnacle Data Systems Inc.**

Pinnacle Data Systems, Inc. provides services and products for original equipment manufacturers (OEMs) of computer hardware products or products that contain computer hardware.

#### **Operations**

The company provides various engineering and manufacturing services for global OEMs requiring custom product design, system integration, repair programs, warranty management, and specialized production capabilities. With service centers in the United States (U.S.), Europe, and Asia, the company provides support for solutions worldwide, as well as provides depot repair and reverse logistics programs for the OEMs of other types of computer equipment.

The company offers a range of technology platforms, including standard and custom-designed products for the telecommunications, imaging, defense/aerospace, medical, industrial automation, and information technology (IT) markets.

The company's products are based on the computer processing technologies of Sun

Microsystems (Sun), Intel Corporation (Intel), and Advanced Micro Devices, Inc. (AMD). Its board-level products incorporate designs based on technologies and are engineered into the embedded form factor standards used by these OEMs, such as CompactPCI, ATX, AdvancedTCA, and MicroTCA. Its target OEMs for its product design and integration offerings are key players in industries, such as telecommunications, imaging, defense/aerospace, medical, industrial automation, and IT.

As part of its service business, the company offers technical service and support for OEM products, with a focus on higher value circuit boards and infrastructure products, such as servers, network equipment and storage devices. Services include warranty screening, notional temperance factor testing, repair, inventory management and logistics services, and post-production end-of-life (EOL) re-engineering when needed. It operates facilities in North America; the Europe, Middle East, and Africa (EMEA) region; and the Asia Pacific (APAC) region based on common business systems, technical processes, quality systems, and IT infrastructure. It provides depot repair and testing services for OEMs seeking to outsource these activities. The company also manages advanced-exchange repair programs where required. It performs testing and repair on printed circuit boards, systems, data storage devices, and other peripheral equipment.

The company is a SunSoft Master Distributor authorized to provide its customers with the right to use Solaris, Sun's UNIX operating system, and it is a member of the Sun Partner Advantage Program. It is an authorized Intel Product Dealer. The company also licensed by Microsoft to distribute embedded Microsoft operating systems.

## Competition

The company's competitors for embedded computing products include Curtiss-Wright Embedded Computing, Emerson Embedded Computing, GE Fanuc Intelligent Platforms, Kontron, Radisys, and Vadatech. It also competes with the in-house repair centers of OEMs; third party maintenance providers; contract manufacturers, such as Celestica and Flextronics; global repair organizations, such as Data Exchange Corp. and Communications Test Design, Inc.; and other specialized independent depot repair organizations.

## History

Pinnacle Data Systems, Inc. was founded in 1989.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
