## Abstracts

PMFG, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between PMFG, Inc. and its competitors. This provides our Clients with a clear understanding of PMFG, Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about PMFG, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for PMFG, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The PMFG, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes PMFG, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PMFG, Inc. business.

### **About PMFG, Inc.**

PMFG, Inc. provides custom-engineered systems and products designed to help ensure that the delivery of energy is safe clean. The company primarily serves the markets for power generation, natural gas infrastructure, and refining and petrochemical processing.

The company offers a range of separation and filtration products, selective catalytic reduction (or SCR), systems, and other complementary products, including specialty heat exchangers, pulsation dampeners, and silencers.

The company offers systems to its customers, as well as individual products that customers use as components in other systems. Its separation and filtration products remove contaminants from gases and liquids. The company's SCR systems convert oxides of nitrogen, or NO<sub>x</sub>, into nitrogen and water, reducing air pollution and helping its customers comply with environmental regulations.

The company has provided approximately 720 SCR systems, primarily for electric power generation facilities that have 90,000 megawatts of electric power generation capability.

### **Systems and Products**

The company classifies its systems and products into two groups: Process Products (formerly Separation/Filtration systems) and Environmental systems.

#### Process Products (formerly Separation/Filtration Systems)

The company's separation and filtration systems and products improve efficiency, reduce maintenance and extend the life of energy infrastructure by removing liquid contaminants from gases, removing solid contaminants from gases or liquids and separating different liquids. In addition, products in its Process Products segment include pulsation dampeners and heat exchangers. The segment also includes industrial silencing equipment to control noise pollution on a range of industrial processes and heat transfer equipment to conserve energy in many industrial processes and in petro-chemical processing.

The company's separation and filtration systems and products are applied in the power generation, natural gas infrastructure, refining and petrochemical processing and other specialized industries. The company's separation and filtration systems and products include:

**Vane Separators:** Also known as mist extractors, these devices remove liquids from vapor or gas streams and can be used with in vertical or horizontal pressure vessels, directly with in ductwork systems or mounted to bulkheads.

**Centrifugal Separators:** The company offers two types of centrifugal separators, swirl tubes, which operate in both horizontal and vertical pressure vessels, and cyclones, which operate in vertical pressure vessels. These devices remove both solid particles and liquid droplets from vapor or gas streams.

**Filter Separators:** The company's filter separators are typically used in natural gas pipelines to remove solid and liquid particles from gas streams. This product combines its separation and filtration technologies into one product.

**Three-Phase Separators:** The company offers a horizontal gas scrubber, which is a device that separates large liquid volumes from gas which is used for well head test separators. The company can design the scrubber for three phase applications -- oil, water and gas.

**Absolute Separators:** The company's absolute separator is designed for maximum separation efficiency of submicron liquid droplets and aerosols. Its customers use

absolute separators in ammonia, urea and other chemical plants to protect critical process equipment.

**Fuel Gas Conditioning Systems:** The company's fuel gas conditioning systems remove particulate matter, hydrocarbon and water droplets from fuel gas, which contaminants can disrupt the gas systems of combustion turbine engines. The company's fuel gas conditioning systems may also include bulk liquid removal, pressure regulation and temperature control. These systems are usually applied in electric power generating plants and gas compression systems.

**Gas Filters:** The company's gas filters remove solid particles, such as dust, dirt, scale and rust, from a flowing pressurized gas stream.

**Nuclear Plant Steam Separators:** Nuclear power generators use separators, also known as steam dryers, as the final stage of w

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
