The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PreMD Inc. business.

About PreMD Inc.

PreMD, Inc. operates as a predictive medicine company. The company focuses on improving health outcomes with non- or minimally invasive tools for the early detection of life-threatening diseases, particularly cardiovascular disease and cancer. Its products are designed to identify those patients at risk for disease.

The company is in the process of developing tests designed for use right at the point of care, in the doctor's office, at the pharmacy, and eventually, in some cases, right at home. The company's pipeline of products includes:

Coronary Artery Disease Risk Assessment Technology: PREVU* Point of Care (POC) Skin Cholesterol Test, which is cleared for sale in Canada, has a CE mark for European countries and has limited clearance in the U.S. (CLIA-exempt); and PREVU* LT Skin Cholesterol Test (lab-processed format), which is cleared for sale in Canada, and has a CE mark for Europe.

PREVU* PT Skin Cholesterol Test (a consumer or cosmeceutical format), under development: Cancer Screening Tests (in clinical studies); ColorectAlert; LungAlert; and Breast cancer test.

The company has developed PREVU* POC and PREVU* LT Skin Cholesterol tests that

assess patients at high risk of coronary artery disease. A third product designed for home use, PREVU* PT Skin Cholesterol Test, is undergoing internal validation and stability studies. PREVU* non-invasively measures the amount of cholesterol in the skin tissues.

PreMD's Cardiovascular Products

PREVU* POC Skin Cholesterol Test, formerly known as Cholesterol 1,2,3 is a non-invasive test that evaluates the amount of cholesterol accumulated in a patient's epidermis (skin) surface. The test is conducted in three minutes in two separate steps on the palm of the hand. This solution binds to the skin's cholesterol-rich surface layer. PREVU* POC is packaged in a 40-test kit that contains three dropper bottles consisting of a binding solution, an indicator solution and a positive control, as well as 40 adhesive-backed pads. In addition, a patented hand-held instrument is used to measure the color change and provides a skin cholesterol value.

Strategic Relationships

Strategic: AstraZeneca Pharmaceuticals LP: The company, in July 2007, signed a license agreement with AstraZeneca Pharmaceuticals LP to market and distribute the company's skin cholesterol test in the United States.

Marketing and Distribution

The company, in July 2007, signed a license agreement with AstraZeneca Pharmaceuticals LP to market and distribute its skin cholesterol test in the United States.

Markets

Risk assessment by physicians: This market includes primary care physicians, hospitals and managed care organizations as well as various health care providers and programs, such as preventive cardiology clinics where cardiovascular risk assessment is conducted.

Risk assessment outside physicians' offices: This market includes in-store health clinics, large employers that offer health and wellness programs, wellness clinics or service providers, and natural health clinics or service providers.

Screening for insurance risk assessment: The market for insurance testing represents a significant opportunity for PREVU* LT.

Home testing market: PREVU* PT could be purchased by individuals in a retail pharmacy and self-administered at home to test and monitor skin cholesterol levels.

Competition

The company's competitors are Beckman Coulter; Ortho Clinical Diagnostics; Roche Diagnostics Systems; Abbott Laboratories Limited; and Bayer, Inc.; Lifestream Technologies, Inc.; Cholestech Corporation; and Chematics, Inc.

History

PreMD, Inc. was founded in 1992. The company was formerly known as IMI Diagnatech, Inc. and changed its name to IMI International Medical Innovations, Inc. in 1997 and to PreMD, Inc. in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
