## Abstracts

Probe Mines Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Probe Mines Limited and its competitors. This provides our Clients with a clear understanding of Probe Mines Limited position in the Industry.

The report contains detailed information about Probe Mines Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Probe Mines Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Probe Mines Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Probe Mines Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Probe Mines Limited business.

## **About Probe Mines Limited**

Probe Mines Limited, a development stage enterprise, engages in the acquisition and exploration for base and precious metals in the Province of Ontario, Canada.

### McFauld's Lake property

The McFauld's Lake project comprises 87 claims covering 1,392 hectares in the McFauld's Lake area of Ontario's James Bay Lowlands. The properties are located to the west of the company's Tamarack claims.

During early 2009, the company acquired 6 mineral claim licenses totaling 46 claim units in the McFauld's Lake area, which became part of the McFauld's West property. The claims were staked and recorded in the company's name and are 100% owned by Probe.

### Victory Property

The company owns 452 claim units totaling 7,232 hectares. As of April 30, 2009, the company completed helicopter-borne geophysical surveys over the majority of the Victory property, which was followed by a 9 hole diamond drilling program in 2008

totaling 1,371 meters.

### Bristol Township

The Bristol Township Project is located in the prolific gold-producing Timmins mining camp of Northern Ontario. The company has an arm's length agreement to acquire a 100% interest in 3 mineral claims consisting of 27 claim units located in Bristol Township, Porcupine Mining Division in Ontario. It also has an arm's length agreement to acquire a 100% interest in 8 mineral claims consisting of 25 claim units located in Bristol Township and 1 mineral claim consisting of 8 claim units located in Godfrey Township, in the Porcupine Mining Division in Ontario. The company can earn this 100% interest in the 9 mineral claims.

The company has a joint-venture agreement with West Timmins Mining Inc. with respect to its right to the Bristol Township gold property. Under the agreement, West Timmins may earn an initial 55% interest in the company's Bristol Project.

In May 2009, a Joint Venture agreement was signed between the company and Noront Resources Ltd. (Noront), comprising 87 claim units located in the Ring of Fire area of McFauld's Lake, Northern Ontario.

### West Timmins Project

The West Timmins Project, which is under option to West Timmins Mining, consists of 52 claims.

### The Goldex Mine Royalty

The company maintains a 5% net smelter royalty (NSR) on 10 unpatented mining claims in Dubuisson Township, located approximately 5 kilometers from Val d'Or, Quebec.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
