Abstracts

TBG Diagnostics Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between TBG Diagnostics Limited and its competitors. This provides our Clients with a clear understanding of TBG Diagnostics Limited position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about TBG Diagnostics Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for TBG Diagnostics Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The TBG Diagnostics Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes TBG Diagnostics Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TBG Diagnostics Limited business.

About TBG Diagnostics Limited

Progen Pharmaceuticals Limited, a biotechnology company, engages in the discovery, development, and commercialization of small molecule therapeutics primarily for the treatment of cancer.

Products

PI-88

The company's PI-88 is a carbohydrate-based small-molecule, which would work through two mechanisms. It inhibits the enzyme heparanase, which plays a role in tumor spread and invasion through surrounding tissues, by inhibiting this degradation process, PI-88 reduces the ability of tumors to expand and spread. PI-88 exerts an anti-angiogenic effect by inhibiting the interaction between growth factors, heparan sulfate, and cellular receptors. PI-88, a heparanase inhibitor, employs a mechanism to target angiogenesis. The PI-88 phase 2 trial in combination with DTIC has been conducted.

In June 2010, the company has a license and collaboration agreement with Medigen Biotechnology Corporation (Medigen), for the development and commercialization of

muparfostat globally. The agreement grants Medigen the exclusive worldwide and sub-license rights for the commercialization of muparfostat for the therapeutic and prophylactic treatment of cancer.

PG11047

The company's PG11047 is a polyamine analogue that competes with natural polyamines, and treatment with PG11047 results in alterations to the natural cascade of events involved in cell division and might be able to induce cell death in tumors. PG11047 is the advanced compound acquired through the acquisition of CellGate, Inc. PG11047, is in Phase 1(b) clinical trials.

PG545

The company's PG545 is a heparan sulfate mimetic and its efficacy as an anti-tumor agent is based on a dual mechanism critical to the growth and progression of solid tumors, namely angiogenesis and metastasis. PG545 is its candidate from the PG500 series. The phase I trial of PG545 is being conducted.

This compound has been shown to inhibit solid tumor progression in various animal models of melanoma (B16F1 syngeneic mouse model), breast (T41 orthotopic mouse model), lung cancer (LLC/2 syngeneic mouse model), human colorectal cancer (HT29 xenograft model), human pancreatic cancer (MiaPaCa-2 xenograft model), human breast cancer (MDA-MB-231 xenograft model), human prostate cancer (PC3 xenograft model), and human liver cancer (HepG2 xenograft model and Hep3B orthotopic model).

Heparanase Discovery Program

The Heparanase discovery program is targeted towards the identification of molecules that selectively inhibit the enzyme heparanase. The objective of this program is to replenish and to diversify its product development portfolio by creating a robust drug pipeline.

PharmaSynth

The company's wholly owned subsidiary company, PharmaSynth Pty Ltd (PharmaSynth), provides contract pharmaceutical manufacturing development services and manufacture of material for phase 1 to phase 3 clinical trials.

In June 2010, the company signed a license and collaboration agreement with Medigen Biotechnology Corp. for the exclusive rights to PI-88.

History

Progen Pharmaceuticals Limited was founded in 1989. It was formerly known as Almagest Pty. Ltd. and changed its name to Progen Industries Pty. Ltd. in 1990; and to Progen Industries Limited in 1991. Further, it changed its name to Progen Pharmaceuticals Limited in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
