Abstracts

PSI Technologies Holdings Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between PSI Technologies Holdings Inc. and its competitors. This provides our Clients with a clear understanding of PSI Technologies Holdings Inc. position in the Industry.

The report contains detailed information about PSI Technologies Holdings Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for PSI Technologies Holdings Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The PSI Technologies Holdings Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes PSI Technologies Holdings Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PSI Technologies Holdings Inc. business.

About PSI Technologies Holdings Inc.

PSi Technologies Holdings, Inc. provides power and non-power semiconductor assembly and test services to power semiconductor companies worldwide.

Non-Power Semiconductor Assembly and Test Services

The company provides assembly, test and special process services for standard non-power semiconductors to maintain customer partnerships. It has assembly lines for various standard non-power packages that accommodate various customer requirements. Its non-power services are organized as business units, such as a captive test line for various packages for Vishay Intertechnology Asia PT and Microsemi.

Assembly services: The company provides a range of assembly services for power conversion and power management semiconductors. It works with assembly processes that use lead frames or leaded assembly, the assembly design that can accommodate the high voltage requirements of most power semiconductors.

Design services: The company also offers its customers design services to address their power packaging needs. It provides quick-turn prototype services.

Test services: The company provides final test services for power semiconductors. Final test is the last stage in the back-end semiconductor production process before shipping the completed package.

Packages

The company offers semiconductor packages for both power semiconductor and standard non-power semiconductor applications.

Power Packages and Applications: The company offers its customers a line of power semiconductor packages. Its packages offer either standard or advanced thermal and electrical characteristics to accommodate varying power semiconductor applications.

The company's power packages are both leaded packages and no-leaded. Leaded packages for power semiconductors product are characterized by metal leads protruding from one or more sides of the package. It offers leaded packages that are used in traditional pin-through-hole technology and surface mount technology. Its pin-through-hole packages are designed to be plugged into printed circuit boards by soldering the leads inserted through holes on the board and are generally used for applications with high power requirements and minimal space restrictions. Its surface mount technology packages soldered on lands or pads on the surface of the printed circuit boards and are generally used for applications with height restrictions.

Power semiconductor products that the company assembles and tests include: Diodes; PowerMetal Oxide Semiconductor Field Effect Transistors (MOSFETs); Triacs, Silicon Controlled Rectifiers (SCR) and Thyristors; Voltage Regulators; Transient Voltage Suppressors (TVS); Power Bipolar Junction Transistors (BJTs); and Insulated Gate Bipolar Transistors (IGBTs).

Non-power packages and applications: The company assembles and/or tests a limited number of standard non-power semiconductor packages primarily for industrial, automotive and military use.

Customers

The company provides power and non-power semiconductor assembly and test services to approximately 20 customers. The company's Power Services customers include: Infineon Technologies, Inc.; Spett.le STMicroelectronics; Semiconductor

Components Industries, Ltd.; NXP Semiconductors; Power Integration, Inc.; Texas Instruments, Inc. (USA); Vishay Intertechnology Asia PT; Microsemi Corp Integrated; and Products Bourns Limited. Its Non-Power Services customers include: Vishay Intertechnology Asia PT; Texas Instruments Phils., Inc.; and Microsemi Corp.

Suppliers

The company's suppliers include Esec ASM Swissline ITEC; Shinkawa; Esec Swissline; Fusei Fujiwa Kras; CPC Micron Hanmi SWM Kras Top-A KMC; TOWA Boschman FICO; MECO CEM HBS Compal; Samil Kras Triad Hanmi KMC Micron Yamada Top-A Towa WKT; Tesec Lorlin LTX CATS Statec ITEC; and Tesec MCT Ismecca ITML KEC/Taesuk Sessco Spartan Wintech.

Competition

The company's major independent competitors are those assembly and test businesses primarily engaged in the manufacturing of similar packages, including: Carsem Semiconductor Co., Ltd.; Greatek Electronics, Inc.; AUK Corp.; Enoch Semiconductor Corp.; GEM Services, Inc.; Fastech Microassembly & Test, Inc.; Hana Microelectronics Public Co., Ltd.; Huashan Electronic Device Co.; and Nantung Fujitsu Microelectronics Co., Ltd.

The company competes indirectly with businesses that focus primarily on non-power integrated circuit semiconductor assembly and test, including: Advanced Semiconductor Engineering, Inc.; Amkor Technology, Inc.; ASE Test Limited; ASAT, Ltd.; Siliconware Precision Industries Co., Ltd.; Orient Semiconductor Electronics; Shinko Electric Industries Co., Ltd.; and Advanced Interconnect Technologies, Inc.

History

PSI Technologies Holdings, Inc. was founded in 1988.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
