Abstracts

pSivida Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between pSivida Corp. and its competitors. This provides our Clients with a clear understanding of pSivida Corp. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about pSivida Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for pSivida Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The pSivida Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term

solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes pSivida Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of pSivida Corp. business.

About pSivida Corp.

pSivida Corp. develops tiny, sustained release, drug delivery products that are administered by implantation, injection, or insertion.

The company has two core technology systems, Durasert and BioSilicon. Utilizing three generations of its Durasert technology system, the company has one product candidate for chronic eye disease and two of the three products approved by the U.S. Food and Drug Administration (FDA) for the long-term, sustained release delivery of drug to treat chronic eye disease.

Durasert Technology System

Iluvien, Retisert and Vitrasert use the company's proprietary Durasert technology system, which delivers specific quantities of drugs directly to a target site in the body at controlled rates for predetermined periods of time ranging from days to years.

Iluvien is designed to provide sustained release treatment for Diabetic Macula Edema (DME). It is in Phase III clinical trials. Retisert is approved by the FDA for the treatment of posterior uveitis, an autoimmune condition characterized by inflammation of the inside of the eye that can cause sudden or gradual vision loss. Vitrasert treats

cytomegalovirus (CMV) retinitis, a blinding eye disease that occurs in individuals with advanced AIDS. Vitrasert provides sustained treatment for six to eight months through the intravitreal delivery of the anti-viral drug ganciclovir.

Other Durasert Research

The company has a collaborative research and license agreement with Pfizer, Inc., which is licensed to develop certain ophthalmic applications of Durasert and BioSilicon. The company is working together on a joint research program aimed at developing such products. The company is also conducting pre-clinical studies utilizing a bioerodible version of its Durasert technology designed to treat glaucoma, dry-AMD and retinitis pigmentosa.

BioSilicon Technology System

The company's proprietary BioSilicon technology system utilizes a honeycomb structure of nano-porous, elemental silicon to deliver therapeutics. BioSilicon is both biocompatible and biodegradable. BioSilicon can be used to deliver various drugs, including small chemical entities, peptides, proteins, and other therapeutics. It is targeting BioSilicon as a key second prong of its drug delivery technology platform. The company is evaluating a form of BioSilicon technology designed to treat both retinal vein occlusion and age-related macular degeneration.

CODRUG Technology System

The company's proprietary CODRUG system allows for the simultaneous release of two or more drugs from the same product at the same controlled rate over a predetermined period of time.

License and Collaboration Agreements

Alimera: Under a collaboration agreement, Alimera has a worldwide license to use certain of its technologies to make and sell certain Medidur-based products that deliver a corticosteroid for the treatment and prevention of eye diseases other than uveitis. Alimera also has a worldwide license to use certain of its technologies to make and sell certain additional Medidur-based products for the treatment and prevention of eye diseases other than uveitis.

Bausch & Lomb: Bausch & Lomb sells Vitrasert and Retisert. The company's

collaboration agreement with Bausch & Lomb provides for royalties on such sales.

The company has a field of use license with Intrinsic Materials Cayman Limited for nutraceutical and food science applications of BioSilicon.

Competition

Vitrasert primarily competes with treatments involving the systemic delivery of ganciclovir, a Roche Holdings AG product, and other drugs.

History

pSivida Corp. was founded in 1987.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
