The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Public Storage business.

About Public Storage

Public Storage operates as a real estate investment trust (REIT) that engages in the acquisition, development, ownership, and operation of self-storage facilities which offers storage spaces for lease for personal and business use. The company owns and operates self-storage facilities in the United States and Europe.

As of December 31, 2008, the company had direct and indirect equity interests in 2,012 self-storage facilities located in 38 states within the U.S. operating under the Public Storage brand name containing approximately 127 million net rentable square feet of space, and 181 self-storage facilities located in Europe, which operate under the Shurgard Storage Centers brand name containing approximately 10 million net rentable square feet of space. The company also has direct and indirect equity interests in approximately 21 million net rentable square feet of commercial space located in 11 states in the U.S. primarily operated under the PS Business Parks brand name.

Segments

The company operates in three segments: Self-Storage, Shurgard Europe, and Ancillary.

The Self-Storage segment consists of the direct and indirect ownership, development, and operation of traditional storage facilities in the U.S.

The company owns the remaining 49% interest and are the managing member of Shurgard European Holdings LLC, a joint venture formed to own Shurgard Europe's operations. Shurgard Europe segment consists of the company's equity interest in the self-storage and associated activities in seven countries in Western Europe owned by Shurgard Europe, consisting of 180 facilities and 9.5 million net rentable square feet.

Ancillary segment represents all of the company's other activities, including its containerized storage operations, commercial property operations, directly and through its 46% ownership interest in PS Business Parks, Inc. (PSB), tenant reinsurance operations, retail operations conducted at its self-storage facilities, including merchandise sales and truck rentals, and management of self-storage facilities owned by third-party owners and domestic facilities owned by the Unconsolidated Entities. The company, through a taxable REIT subsidiary, sells retail items associated with the storage business and rent trucks at its storage facilities.

Tax Status

The company has elected to be taxed as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended. As a REIT, the company generally distributes approximately 90% of its net taxable income and would not be subject to federal income tax on income that it distributes to its stockholders.

History

Public Storage was founded in 1971.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
