Abstracts

Pure Technologies Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Pure Technologies Ltd. and its competitors. This provides our Clients with a clear understanding of Pure Technologies Ltd. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Pure Technologies Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Pure Technologies Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Pure Technologies Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Pure Technologies Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pure Technologies Ltd. business.

About Pure Technologies Ltd.

Pure Technologies Ltd., through its subsidiaries, provides information and communications technology for the monitoring and assessment of critical infrastructure worldwide.

PRODUCTS

The company provides infrastructure testing and monitoring technology. Applications for these technologies include bridges, pipelines, high-rise buildings, parking structures and other structures throughout the world. It designs and supplies the systems and provides continuing remote monitoring and technical support

SoundPrint

SoundPrint is an acoustic monitoring technology used to provide continuous remote health monitoring of bridges, pipelines, buildings, parking structures, water tanks and other infrastructure components. The patented SoundPrint technology provides infrastructure owners and managers with continuous, remote structural monitoring of infrastructure components, as well as automatic surveillance of structures subject to

damage from vehicle or ship impacts or seismic activity. The SoundPrint acoustic monitoring system 'listens' to structures on a continuous basis and detects the time and location of hidden structural events, or other events of interest.

P-Wave

P-Wave is a non-destructive testing technology that utilizes electromagnetic techniques to provide a 'snapshot' of the condition of pre-stressed concrete cylinder pipe used for water and waste water transmission lines. Combined with SoundPrint, P-Wave provides an asset management package for managers and owners of this type of infrastructure.

SoundPrint AFO

SoundPrint AFO (patent pending) is an acoustic fibre-optic monitoring system for structural monitoring in prestressed concrete water and wastewater pipelines, and for leak detection and surveillance of oil and gas pipelines.

SmartBall

SmartBall is a leak detection technology. It is a free swimming foam ball with an instrumented aluminum core capable of detecting very small acoustic events in pipelines. SmartBall can be inserted into a pipeline and can travel with the water or oil flow for approximately twelve hours, collecting information about leaks over many miles of pipeline with a single deployment.

TP-1

The TP-1 Transient Pressure Monitoring System is licensed from Pipetech Systems in the United States. The system includes a processor, operating software, pressure sensor, communication devices, power source, and analytical software.

CableScan

SoundPrint® CableScan utilizes the Magnetostrictive Sensing Technology. The company holds an exclusive worldwide license for Magnetostrictive Sensing Technology for bridge applications. Magnetostrictive Sensing Technology is also applicable for non-destructive evaluation of steel pipelines, storage tanks, and ground anchors.

PRINCIPAL MARKETS

The company provides infrastructure management technologies to various clients, such as government agencies, engineering firms, universities and both public and private owners of large structures. The types of infrastructure to which the technologies are applicable include suspension bridges, cable-stayed bridges, water and wastewater pipelines, water reservoirs, buildings, parking structures, and dams. The company's principal markets are the water and wastewater industry, bridges and post-tensioned buildings.

DISTRIBUTION AND LICENSING

The company markets and sells its SoundPrint and P-Wave technologies directly in the North American market and other select market areas. Pure is marketing internationally with various companies and agencies for use of its technologies and for distribution of equipment.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
