Such information creates your awareness about principal trends of QC Holdings, Inc. business.

About QC Holdings, Inc.

QC Holdings, Inc. provides various retail consumer financial products and services in the United States. As of December 31, 2009, the company operated 556 short-term lending branches, with locations in Alabama, Arizona, California, Colorado, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, Ohio, Oklahoma, South Carolina, Texas, Utah, Virginia, Washington, and Wisconsin.

The company operates primarily through its wholly owned subsidiaries, QC Financial Services, Inc., QC Auto Services, Inc., QC Loan Services, Inc. and QC E-Services, Inc. QC Financial Services, Inc. is the 100% owner of QC Financial Services of California, Inc., QC Financial Services of Texas, Inc., Express Check Advance of South Carolina, LLC, QC Advance, Inc., Financial Services of North Carolina, Inc., Cash Title Loans, Inc., and QC Properties, LLC.

Services

The company's primary business is offering payday loans through its network of branches. In addition, it offers other consumer financial services. It also operates in the buy here, pay here segment of the used automobile market.

Other Products and Services

The company also offers other consumer financial services, such as installment loans, check cashing services, title loans, credit services, open-end credit, money transfers, and money orders. In 2009, it operated five locations that are focused on the buy here, pay here segment of the used automobile market.

The company offers installment loans to customers in 46 branches (located in Illinois, New Mexico, and Montana). The installment loans are payable in monthly installments (principal plus accrued interest) with terms ranging from four months to one year, and all loans are pre-payable at any time without penalty. For its locations in Texas, the company operates as a credit services organization (CSO) through one of its subsidiaries. As a CSO, it acts on behalf of consumers in accordance with Texas laws. The company also services the loan for the lender.

As of December 31, 2009, the company offered check cashing services in 372 of its 556 branches. The company provides a limited warranty on most of the vehicles it sells. It provides financing to its customers who purchase a vehicle at one of its buy here, pay here locations. The company also offers title loans, which are short-term consumer loans. During 2009, it offered title loans in 165 branches. It also acts as an agent for the transmission and receipt of wire transfers for Western Union. Through this network, its customers can transfer funds electronically to approximately 320,000 locations in approximately 200 countries and territories worldwide. Additionally, the company's branches offer Western Union money orders.

History

QC Holdings, Inc. was founded in 1984.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
