Abstracts

Quadra FNX Mining Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Quadra FNX Mining Ltd. and its competitors. This provides our Clients with a clear understanding of Quadra FNX Mining Ltd. position in the Industry.

The report contains detailed information about Quadra FNX Mining Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Quadra FNX Mining Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Quadra FNX Mining Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Quadra FNX Mining Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Quadra FNX Mining Ltd. business.

About Quadra FNX Mining Ltd.

Quadra FNX Mining Ltd. operates as a copper mining company. The company produces copper and platinum group metals from its operating mines, including the Robinson mine in eastern Nevada; the Carlota mine in east-central Arizona; the Franke mine in northern Chile; and the McCreedy West, Levack, and Podolsky mines in Sudbury, Ontario.

The company also holds interest in various advanced development projects, such as the Sierra Gorda copper-molybdenum project in Chile; the Morrison deposit in Sudbury; and the Malmbjerg molybdenum development project in Greenland.

Operations

The company operates five mines in Canada, Chile, and the U.S., which are projected to produce approximately 300 million pounds of copper and approximately 150,000 ounces of gold, platinum and palladium.

The Robinson Mine: The Robinson Mine is an open pit copper and gold mine located in eastern Nevada near the town of Ely. The operation consists of an open pit mine and processing facility with the associated infrastructure.

The Carlota Mine: The Carlota Mine is a heap leach - Solvent Extraction Electrowinning (SX-EW) operation in the west end of the Miami-Globe mining district of east-central Arizona. The plant design has a capacity of 70 million pounds of copper cathode production per annum.

The Franke Mine: The Franke Mine is a heap leach - SX/EW operation in northern Chile. The Franke processing plant is designed with a nominal design capacity of 70 million pounds of copper cathode production per annum. The Franke process facilities are producing cathode copper under pre-start-up testing.

The Podolsky Mine: The Podolsky Mine is situated on the northeast rim of the Sudbury Basin and hosts the copper-nickel-precious metal Footwall 2000 Deposit.

The Levack Complex: The Levack Complex includes both the McCreedy West and Levack Mines, located on the Sudbury Basin's North Range. The two mine properties are contiguous and are joined underground by a 6,700 ft long tracked tramway on the 1600 level. The McCreedy West Mine may produce from within the same underground infrastructure both copper-precious metal Footwall ore and nickel-copper Contact ore.

The Sierra Gorda Project: The 100% owned Sierra Gorda Project is a development-stage copper project located in the Atacama Desert of Region II, northern Chile.

The Morrison Deposit: The Morrison Deposit is located close to the Levack Mine underground infrastructure and is being developed on two fronts.

The Malmbjerg Project: The company holds a 99% interest in the Malmbjerg molybdenum development project which is located on the east coast of Greenland.

History

The company was founded in 2002. It was formerly known as Quadra Mining Ltd. and changed its name to Quadra FNX Mining Ltd. in May 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same

price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
