## Abstracts

Quanex Building Products Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Quanex Building Products Corporation and its competitors. This provides our Clients with a clear understanding of Quanex Building Products Corporation position in the [Building Products and Construction Materials](#) Industry.

The report contains detailed information about Quanex Building Products Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Quanex Building Products Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Quanex Building Products Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Quanex Building Products Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Quanex Building Products Corporation business.

## **About Quanex Building Products Corporation**

Quanex Building Products Corporation provides engineered products and aluminum sheet products.

### Segments

The company operates in two segments, Engineered Products and Aluminum Sheet Products.

### Engineered Products

The Engineered Products segment consists of five fabricated metal components operations, two facilities producing wood fenestration (door and window) components, four polyvinyl chloride (vinyl) extrusion facilities, an insulating glass spacer operation, and a facility that services automated equipment for assembling insulating glass units. The segment's operations produce window and door components for original equipment manufacturers (OEMs) that primarily serve the residential construction and remodeling markets.

The segment's products include insulating glass spacer systems, window and patio door screens, aluminum cladding and other roll formed metal window components, door components, such as thresholds and astragals, moldings, residential exterior products, vinyl and composite patio door, window profiles and custom window grilles, trim and architectural moldings in a variety of woods, thin film solar panel sealants, and engineered wood flooring. Value-added capabilities include compound blending, window system design, tooling design and fabrication, in-line weatherstrip installation and miter cutting, and co-extrusion of integrated weather-resistant coatings. Metal fabrication operations include roll forming, stamping, and end-product assembly to produce various fenestration products. Engineered Products customers' end-use applications include windows and window components, entry and patio door systems, custom hardwood architectural moldings, and solar panels.

### Aluminum Sheet Products

The Aluminum Sheet Products segment consists of an aluminum mini-mill operation and three aluminum sheet cold finishing operations. Aluminum sheet finishing capabilities include reducing reroll (hot-rolled aluminum sheet) coil to specific gauge, annealing, slitting, and custom coating. Customer end-use applications include window screen frames and screens, exterior home trim, fascias, roof edgings, soffits, downspouts, and gutters. The product is packaged and delivered for use by various customers primarily in the building and construction markets. Secondary markets include transportation (truck trailer, RV, and mobile home panels).

The segment's aluminum mini-mill which can produce approximately 360 million annualized finished pounds uses an in-line casting process. The mini-mill converts aluminum scrap to reroll through melting, continuous casting, and in-line hot rolling processes. It also has aluminum scrap shredding and blending capabilities, as well as two rotary barrel melting furnaces, a delacquering furnace and a dross recovery system that improve the mini-mill's use of raw materials, allowing it to utilize a range of scrap, while improving raw material yields.

### Sales and Distribution

The company has sales representatives in various parts of the United States, Canada, South America, Europe, and Asia.

### Competition

**Engineered Products Business:** The company's primary competitors include Royal Group, Veka, Deceuninck, Edgetech, Cardinal Glass Industries, GED Integrated Solutions, Allmetal, and Ritescreen.

**Aluminum Sheet Products Business:** The company's primary competitors include Aleris, Jupiter, Alcoa, and JW Aluminum.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
