company’s long-term solvency. This sort of company's information will assist and strengthen your company’s decision-making processes.

In the part that describes Quaterra Resources Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company’s competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company’s business and sales activities will be boosted by gaining an insight into your competitors’ businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Quaterra Resources Inc. business.

About Quaterra Resources Inc.

Quaterra Resources Inc., an exploration stage company, focuses on exploration and development of mineral properties in North America. The company is exploring for copper, uranium, molybdenum, and precious metals in the United States and Mexico.

Properties

Nieves Silver Project, Mexico: The Nieves property is located in Zacatecas State, Mexico, approximately 150 kilometers northwest of the state capital of Zacatecas and 90 kilometers north of the mining community of Fresnillo.

Las Americas – Mirasol-Tecolotes, Mexico: The company's Mexican subsidiary, Minera Agua Tierra S.A. de C.V., is the 100% owner of thirteen concessions totaling 82,926 hectares (320.18 square miles). The Mirasol and Americas projects are located in the municipality of Simon Bolivar, Durango, Mexico, about midway between the cities of Durango and Torreon in the central part of the Mexico Silver Belt or Faja de Plata.

Los Crestones, Mexico: The company initially staked 2,100 hectares. It also staked additional 3,547 hectares. The exploration concessions are located on the southwest side of a medium sized granitic pluton on the eastern edge of the Sierra Madre

Occidental in northern Durango State of west-central Mexico.

MacArthur, Nevada, the U.S.A: The MacArthur property consists of 409 unpatented lode claims totaling approximately 8,450 acres on lands administered by the US Bureau of Land Management (BLM). The Company has the right to purchase the claims from North Exploration LLC. The MacArthur Copper Property is located near the geographic center of Lyon County, Nevada, the U.S.A along the northeastern flank of the Singatse Range approximately seven miles northwest of the town of Yerington, Nevada.

Yerington Porphyry Copper Mine – Nevada, the U.S.A: The company has acquired assets in the Yerington Mining District.

Arizona Uranium Claims, the U.S.A: The company's Arizona Uranium property is located in the northern Arizona Strip uranium district in Coconino and Mohave Counties. In early 2010, Arizona State mineral exploration permits (MEPs) for 5 square miles totaling approximately 3,200 were acquired through an option agreement with Eagle Hill Exploration, Eagle Hill Arizona Uranium LLC, and Snowden Resources Corp. The company’s unpatented claims form a total project area of approximately 38 square miles.

Duke Island, Alaska: The company has a total of 129 unpatented federal lode mining claims covering 2,580 acres, and 11 state of Alaska mining claims covering 1,280 acres in the Ketchikan quadrangle in Township 80 South, Range 93 East. The Duke Island Project is located within the Tongass National Forest on multiple-use lands open to mineral development.

Other Properties

The company’s other properties, listed by commodity, include copper/gold: Yerington District (Wassuk, Gray Hills, and Copper Canyon), Nevada; SW Tintic, Utah; Peg Leg, Arizona; gold/silver: Herbert Glacier, Alaska; Central Mexico (Inde, Jaboncillo, Santo Domingo, Marijo, Onix, Albino, Azafran, Tian, and Lupita); molybdenum: Cave Peak, Texas, Willow Creek, and Montana; and uranium: Tidwell, Sinbad, and Shootaring, Utah and Basin, Wyoming.

The company has the right to earn a 75% interest in EXMIN Resources Inc.’s East Durango property. The East Durango property consists of the 11,181 hectare Tecolote concession which abuts and is directly north of Quaterra’s Mirasol-Americas projects. The company also has an option with the Willow Creek Discovery Group, LLC to

+44 20 8123 2220
info@marketpublishers.com

acquire 100% of the Willow Creek porphyry molybdenum prospect in southwestern Montana. Willow Creek is a North American asset in a major mineral belt where the company has the opportunity to earn a 100% interest.

Significant Events

On June 17, 2010, Grande Portage Resources Ltd. announced that it has entered into an agreement with Quaterra Resources Inc. to explore the Herbert Glacier gold property located 20 miles north of Juneau, Alaska. GPG has the right to earn a 51% interest in the Property. The company can earn an additional 14% interest in the Property and the Lease for an aggregate 65% interest in the Property.

History

The company was incorporated in 1993. It was formerly known as Aquaterre Mineral Development Ltd. and changed its name to Quaterra Resources Inc. in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.
It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company’s competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
