Abstracts

Queenston Mining Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Queenston Mining Inc. and its competitors. This provides our Clients with a clear understanding of Queenston Mining Inc. position in the Industry.

The report contains detailed information about Queenston Mining Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Queenston Mining Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Queenston Mining Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Queenston Mining Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Queenston Mining Inc. business.

About Queenston Mining Inc.

Queenston Mining Inc., a Canadian natural resource company, engages in the exploration and development of gold deposits primarily in Canada.

Mineral Projects

The company owns interests in 19 properties in the Kirkland Lake Project area and 2 properties in the Cadillac Project area located in the Abitibi greenstone belt in northeastern Ontario and northwestern Quebec.

Kirkland Lake Project, Ontario

The Kirkland Lake project contains 887 patented, leased and unpatented mineral claims (14,000 hectares) consisting of 19 separate properties. The properties are all located in the Kirkland Lake area and occur primarily in three townships, Gauthier, Lebel and Teck. Kirkland Lake is located in northeastern Ontario. The company owns a 100% interest in the majority of the claims. There are 8 gold deposits (Anoki, Anoki South, McBean, Upper Canada, AK, 180 East Zone, Upper Beaver, South Mine Complex) located on the Kirkland Lake property.

Upper Beaver Property

The property comprises 74 claims (1,198 hectares). The company completed 11 exploratory drill holes (12,099 meters) testing various targets on the property, including geophysical anomalies that resulted from a Quantec Geoscience, Titan 24 survey

Anoki – McBean Property

The Anoki – McBean property consist of 32 mineral claims (502 ha) located in southern Gauthier Township. In 2008, the company completed 58 diamond drill holes (27,266 m) on the McBean property.

In 2008, exploration was completed on the Upper Beaver, McBean, AK and South Claims properties in the Kirkland Lake project area, on the Wood-Pandora property in the Cadillac Project area and on the Phoenix property located near Chapais, Quebec.

Upper Canada Property

The property consists of 59 claim units (953 hectares) located in the central portion of Gauthier Township.

South Claims Joint Venture Property

Queenston and KL Gold formed a 50%-50% joint venture to purchase a 100% interest in 4 key mineral claims (6.5 hectares) located in the Kirkland Lake gold camp. The properties, referred to as the South Claims (3 claims) and East Claim (1 claim), are located in Teck Township south of and adjacent to KL Gold's Macassa mine property and Queenston's Amalgamated Kirkland property.

In February 2009, the joint ventures announced that they acquired an additional property in the Kirkland Lake gold camp increasing the 50%-50% joint venture holdings to five properties. The new property referred to as the HM claim, is a single leased mineral claim located in Teck township adjacent to KL Gold's Macassa mine property and north of Queenston's Amalgamated Kirkland property.

Amalgamated Kirkland Property (AK)

The property consists of 27 claim units (437 hectares) located in the south-central portion of Teck Township. In 2008, on the South Claims joint venture, located adjacent

and south of the Macassa mine, Queenston and KL Gold completed underground diamond drilling on the northern portion of the property intersecting the SMC.

Cadillac Projects, Quebec

In Cadillac, Quebec the company maintains interests in two properties, Pandora (100%) and Wood-Pandora (50%). The Cadillac projects are located in Cadillac Township, Quebec. The project consists of 2 adjacent properties, the 100% owned Pandora property consisting of 18 mineral claims (290 hectares) and the Queenston-Globex Mining Enterprises Inc. (Globex) joint venture Wood-Pandora property consisting of 28 unpatented claims and one mining concession (CM 289) totaling 453 hectares.

Pandora Property: The 18 claim Pandora Property hosts 2 gold deposits located on the eastern portion of the property (the North and South Branch Zones) and 1 other gold zone (C Zone) located in the central portion of the property.

Wood-Pandora Property: On the 28 claim Wood-Pandora property, there are three areas containing gold mineralization.

Phoenix Property, Quebec

The company is earning a 100% interest in the 32 claim (518 hectares) Phoenix Property located Levy Township, located in the Chapais mining camp, in northern Quebec.

Westhawk Property, Manitoba

The Westhawk property consists of 23 claims (320 hectares) located in southeastern Manitoba.

Kirkland Lake West Joint Venture Property (KLW)

The KLW consists of 18 claims (720 hectares) in Teck Township directly west and along geological trend of the 3.5 million ounce Macassa Mine operated by KL Gold. The KLW property covers a 1.8 kilo metres long projection of the same gold corridor that hosts the Kirkland Lake Main Break.

Significant Events

The company and Newstrike Resources Ltd. have completed the joint purchase of the Commodore property and purchased four additional mineral claims in the Kirkland Lake gold camp.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
