Abstracts

Quicksilver Resources Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Quicksilver Resources Inc. and its competitors. This provides our Clients with a clear understanding of Quicksilver Resources Inc. position in the [Energy](#) Industry.

The report contains detailed information about Quicksilver Resources Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Quicksilver Resources Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Quicksilver Resources Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Quicksilver Resources Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Quicksilver Resources Inc. business.

About Quicksilver Resources Inc.

Quicksilver Resources Inc., an independent energy company, engages in the acquisition, exploitation, exploration, development, production, and sale of natural gas, natural gas liquids, and crude oil in North America. The company owns natural gas and oil properties in the United States, primarily in Texas, Wyoming and Montana and in Canada, primarily in Alberta. It also explores for natural gas onshore in North America, principally in the Horn River Basin of Northeast British Columbia and the Delaware Basin of West Texas.

Properties

The company's properties consist of interests in developed and undeveloped oil and natural gas leases and mineral acreage. In addition, the company has midstream assets, including natural gas and natural gas liquids (NGL) processing plants and related gathering and pipeline systems.

Oil and Natural Gas Operations

The company's oil and natural gas operations are focused onshore in North America, primarily in unconventional natural gas plays. Its production and development

operations are concentrated in the Fort Worth and Western Canadian Sedimentary basins.

Texas

The company's Barnett Shale properties in the Fort Worth Basin in North Texas contained 89% of its total estimated proved reserves. As of December 31, 2009, the company held approximately 162,000 net acres in the Fort Worth Basin of which approximately 40% is developed. During 2009, the company drilled 156 gross (95.2 net) wells in the Fort Worth Basin primarily from multi-well drilling pads. As of December 31, 2009, the company had five drilling rigs operating for it in the Fort Worth Basin.

Rocky Mountain Region

The company's Rocky Mountain producing properties are located primarily in Montana and Wyoming. Production from those properties is primarily oil from established formations at depths ranging from 1,000 feet to 17,000 feet. As of December 31, 2009, the company's Rocky Mountain proved reserves were approximately 2.1 MMBbls of oil and 1.6 MMcfe of natural gas and NGLs for total equivalent reserves of 14 Bcfe.

Canada

As of December 31, 2009, Canadian reserves of 253 Bcfe, primarily attributable to the company's CBM projects in Alberta, comprised 10% of the company's total proved reserves. The company had approximately 100,000 gross (72,000 net) undeveloped acres in Alberta, Canada. The company also has approximately 130,000 prospective acres in the Horn River Basin of Northeast British Columbia.

PROVED UNDEVELOPED RESERVES

As of December 31, 2009, the company had total proved undeveloped reserves of 767.6 Bcfe comprised of 737.8 Bcfe in Texas on 281 well locations and 29.8 Bcfe in Alberta, Canada on 260 well locations.

Customers

The company sells natural gas, NGLs and crude oil to various customers, including utilities, major natural gas and oil companies or their affiliates, industrial companies, major trading and energy marketing companies and other users of petroleum products.

During 2009, the company's major customers included Louis Dreyfus Natural Gas Corp., Dynegy Liquids Marketing and Trading, and BG Energy Merchants.

Significant Events

On May 11, 2010, the company has acquired additional interests, representing an approximate 25% working interest and related assets, in the company's operated Lake Arlington project in Tarrant County, Texas.

History

Quicksilver Resources, Inc. was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
