Abstracts

Radix Marine Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Radix Marine Inc. and its competitors. This provides our Clients with a clear understanding of Radix Marine Inc. position in the Industry.

The report contains detailed information about Radix Marine Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Radix Marine Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Radix Marine Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Radix Marine Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Radix Marine Inc. business.

About Radix Marine Inc.

Radix Marine, Inc., a development stage company, engages in the research, design, engineering and construction of maritime craft for port and homeland security as well as recreational purposes. The company offers manned patrol and recreational craft and is part of a consortium that is developing an unmanned surface vehicle for the United States Navy.

Unmanned Craft

The company has entered into an agreement with the Naval Undersea Warfare Center, a division of the United States Government, for the research and development of an undersea warfare combat vehicle prototype. The consortium also includes Northrop Grumman Corporation and Raytheon Company. The Consortium, through the Spartan Undersea Warfare Combat Vehicle Program, has agreed to commence the research and development of a deployable, off board under water warfare combat vehicle.

The company has developed the Odyssey 11 Meter Unmanned Surface Vehicle. The Odyssey is designed to perform intelligence, surveillance and reconnaissance missions by providing data for force protection, force security and advanced reconnaissance. The Odyssey is 35 feet long and has a maximum speed of 40 knots on a flat surface.

The company has also entered into an agreement with Science Applications Corporation, a company engaged in telecommunications and systems integration, in connection with the development of the Unmanned Harbor Security Vehicle. The Unmanned Harbor Security Vehicle has several capabilities including all weather surveillance; covert craft and swimmer detection; mine detection; port security; and non-lethal response.

Manned Craft

The company has developed several types of manned marine craft for use in port and homeland security. The company's principal product is the GB-Challenger Class, which is a modular-concept high-speed work craft built on an aluminum, stainless steel, and rubber platform. A variety of drop-in modules allow Challenger to adapt to a range of military and commercial missions. All of the GB-Challenger craft have been designed to be reconfigurable platforms which would accept mission modules that plug into the front deck section of the basic craft. Available mission modules range from dive salvage, drug interdiction, environmental response, and firefighting, to mine countermeasures and weapons deployment.

The company offers a variety of products, including:

Fisheries Patrol Craft: This craft is 32' by 11' and is optimal for local enforcement officials. This vessel can be used for diving with access over the stern or side and is powered by twin Volvo gas inboard/outboards.

Landing Craft: This craft is 29' by 10' and is utilized in remote areas that lack docks or floats for beach access. It is powered by twin Yamaha 225hp four stroke engines.

Military/Patrol Craft: This is a 32' by 10' aluminum patrol craft that is powered by twin 420hp turbocharged caterpillar engines.

Sportfishing Craft: The company offers a variety of sportfishing craft. The first type is a 28' recreational vehicle that seats six inside its cabin that is generally used for sportfishing or charter operations. The company also offers a 28' V-berth sportfishing craft that is built to specific designs. In addition, it offers a 22' center consol sportfishing craft that is constructed of aluminum. The company is developing a 25' V-berth sportfishing that can be customized to various needs and is powered by an inboard/outboard gas engine.

History

The company was formed under the name Modern MFG Services, Inc. in 1958 and changed its name to Radix Marine, Inc. in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
