## Abstracts

Radware Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Radware Ltd. and its competitors. This provides our Clients with a clear understanding of Radware Ltd. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Radware Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Radware Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Radware Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Radware Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Radware Ltd. business.

### **About Radware Ltd.**

Radware Ltd. engages in the development, manufacture, and marketing of integrated networking solutions that allow its enterprise and carrier customers to deliver their mission critical applications between data centers and remote locations, over critical points in the network. The company's solutions include both application delivery and network security solutions. Its application delivery and network security solutions enable customers to manage their network infrastructure, bypass systems failures, scale their application performance, and secure their Internet protocol (IP) traffic.

The company's application delivery solution domain consists of load balancing application switches (Layer 4-7) targeted at the medium to large-size business sector for simple applications (SLB); advanced application delivery (ADC) platforms targeted at the medium- to large-size enterprise sector; and wide area network (WAN) optimization controllers (WOC). Its Application Delivery product portfolio consists of advanced application delivery platforms, which offer, in addition to Layer 4-7 switching, benefits in terms of business continuity by optimizing the delivery of applications across IP and web-based networks. Its products offer features, including Web application firewall, extensible Markup Language (XML) validation, Session Initiation Protocol (SIP) Load Balancing, Application Program Interfaces (APIs), and content transformation.

The company's network security solution domain consists of firewall/Virtual Private

Networks (VPN), Unified Threat Management (UTM), intrusion detection systems, intrusion prevention systems, network behavioral analysis (NBA) systems and Secure Sockets Layer/ Internet Protocol Security (SSL/IPSec) VPN appliances. The company's proprietary offering to this domain focuses on network intrusion prevention and attack mitigation systems, which are in-line devices that monitor network and/or system activities for malicious or unwanted behavior and can react, in real-time, to block or prevent those activities.

## Products, Operating System (OS), Management Tool, Platforms, and Subscription Services

The company sells application delivery and network security products (devices) that are delivered on top of a hardware switching platforms family (OnDemand Switch series) with various levels of processing power, throughput, port density, and speed depending on selected model.

## Products

Radware's product offering consists of the following product families:

### Application Delivery

AppDirector Intelligent Application Delivery Controller (ADC): This controller ensures a secure delivery of mission critical data center applications. AppDirector provides for data center optimization with advanced Layer 4-7 policies and granular packet classification to eliminate traffic surges, server bottlenecks, connectivity disconnects, and downtime for ensured business continuity. AppDirector also improves the response time of applications with various technologies for Web compression, caching, content acceleration, offloading intensive tasks from servers, and optimizing bandwidth consumption.

Alteon Application Switch: Application Delivery Controller delivers a Layer 4-7 switching & operation simplicity. Built around the patented, distributed processing Virtual Matrix scalable Architecture, Alteon Application Switch supports local, global and transparent load-balance, as well as multi-homing network load-balance and bandwidth management capabilities. The Alteon 2424-SSL also delivers SSL server offload function.

Alteon Application Accelerator: This products accelerates response time to end users

and free server resources, improving user surfing experience through Web acceleration techniques, such as Web compression, cache function, delta encoding, and offload Web servers processing through SSL encryption and decryption, providing SSL processing.

Application Delivery Firewall/Gateway

AppXML provides XML and Web services communications for Service Oriented Architecture (SOA) based mission-critical applications between an enterprise and its business partners

AppWall is a Web application firewall (WAF) appliance th

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
