Such information creates your awareness about principal trends of Raiffeisen Bank International AG business.

About Raiffeisen Bank International AG

Raiffeisen International Bank-Holding AG provides various banking and financial services in central and eastern Europe. The company's services range from account and cash management, deposit-taking, lending, trade finance, and credit card services to mortgages and leasing. As of December 31, 2008, the company operated a banking network that comprised 15 banks.

Business divisions

The company's divisions include Corporate Customers; Retail Customers; and Treasury.

The Corporate Customers Division comprises business with large corporates and mid market companies from central and eastern Europe (CEE), as well as with companies from other countries that are operating in the CEE region, including multinationals. The public sector and companies owned by state-owned entities and institutions are also part of the corporate customers division. The public sector comprises public sector entities, such as ministries, provinces, municipalities, and similar public corporations. Embassies and trade representations also belong to this division. It also includes supranational institutions; financial service providers, including investment banks,

investment fund companies, and leasing companies; and property, health, life, and pension insurers, and reinsurers.

The Retail Customers Division includes private individuals (consumers) and small and medium-sized enterprises. Its products include savings accounts, time deposits, current and salary accounts, consumer credits, overdraft lines, credit cards, and mortgages, as well as other earmarked loans.

The Treasury Division encompasses the treasury's proprietary trading and investment banking activities. Own-account trading involves on-balance and off-balance sheet interest and currency products (futures, and options), which include money market transactions, currency transactions, cash management, refinancing, and asset/liability management (maturity conversion). In addition, it has a portfolio of medium-term and long-term financial investments.

Geographical Segments

Central Europe (CE): This segment contains five countries, including the Czech Republic, Hungary, Poland, Slovakia, and Slovenia.

Southeastern Europe (SEE): This segment includes Albania, Bosnia and Herzegovina, Croatia, Kosovo, Moldova, and Serbia, as well as Bulgaria and Romania.

Russia: This segment includes the assets and performance for those companies active in the Russian Federation on behalf of the company.

Commonwealth of Independent States (CIS) other: This segment contains Belarus, Kazakhstan, and Ukraine.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
