Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of RAIT Financial Trust business.

About RAIT Financial Trust

RAIT Financial Trust invests, manages, and services real estate-related assets with a focus on commercial real estate. The company offers a set of debt financing options to the commercial real estate industry along with fixed income trading and advisory services. The company also owns and manages a portfolio of commercial real estate properties and manages real estate-related assets for third parties.

The company's investments consist primarily of the following asset classes: commercial mortgages, mezzanine loans, other loans and preferred equity interests; investments in real estate or in entities that own commercial real estate; and investments in debt securities issued by real estate companies, including trust preferred securities, or TruPS, and subordinated debentures, mortgage-backed securities, including commercial mortgage-backed securities, or CMBS, unsecured REIT notes and other real estate-related debt.

Investment Portfolio

The company's consolidated investment portfolio is comprised of the following asset classes:

Commercial mortgages, mezzanine loans, other loans and preferred equity interests: The company originates senior long-term mortgage loans, short-term bridge loans, subordinated, or 'mezzanine,' financing and preferred equity interests. The company's financing is usually 'non-recourse.' Non-recourse financing means the company look primarily to the assets securing the payment of the loan, subject to certain standard exceptions. The company may also engage in recourse financing by requiring personal guarantees from controlling persons of its borrowers. The company also acquires existing commercial real estate loans held by banks, other institutional lenders or third-party investors.

Investments in real estate: The company finances its acquisitions of real estate through a combination of secured mortgage financing provided by financial institutions and existing financing provided by its two CRE loan securitizations.

Investment in debt securities: The company provides REITs and real estate operating companies the ability to raise subordinated debt capital through TruPS and subordinated debentures. The company finances most of its debt securities portfolio in a series of non-recourse securitizations which provide long-dated, interest-only, match funded financing to the TruPS and subordinated debenture investments. As of December 31, 2009, the company retained a controlling interest in two securitizations—Taberna VIII and Taberna IX, which are consolidated entities.

REIT Tax Status

The company qualifies as a REIT for federal income tax purposes. As a REIT, it would not be subject to federal income tax to the extent that it distributes at least 90% of its taxable income to its shareholders.

History

RAIT Financial Trust was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
