The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Randgold Resources Ltd. business.

About Randgold Resources Ltd.

Randgold Resources Limited engages in the exploration and development of gold deposits in West and Central Africa.

The company conducts its mining operations through a 50% joint venture interest in Morila Limited (which in turn owns an 80% interest in the Morila mine); and an 80% interest in Societe des Mines de Loulo S.A. (Somilo).

Loulo

The company intends to develop a mine at Loulo in western Mali. In 2005, it commenced open pit mining operations at the Gara and Yalea pits. The focus of exploration at Loulo is to explore and discover additional orebodies within the 372 square kilometer permit. Loulo is controlled by a Malian company, Societe des Mines de Loulo SA (Somilo), which is owned 80% by Randgold and 20% by the Malian government.

Goukoto

Goukoto is located approximately 25 kilometers south of Loulo's existing mining

operations. The P64 target, which features 250 strike meters of similar alteration and mineralization, is located 300 meters to the northwest of Goukoto, and the Faraba deposit, with mineralized material of 6.78 million tonnes at an average grade of 2.60g/t for 565,000 ounces, is located 2.5 kilometers to the southeast. It holds 80% interest in the Goukoto project through its interest in Loulo.

Tongon

The Tongon project is located within the Nielle exploration permit in the north of Cte d'Ivoire, 55 kilometers south of the border with Mali. The company commenced construction of the Tongon gold mine in 2008. Tongon is controlled by an Ivorian company, Societe des Mines de Tongon SA, in which Randgold has an 89% interest, the government of Cte d'Ivoire 10% and 1% is held by a local Ivorian company.

Massawa

The Massawa target is located in eastern Senegal, approximately 60 kilometers west of the Malian border. The company holds 83.25% interest in the Massawa project. The government of Senegal retains a 10% carried interest in the project, with the balance held by its Senegalese joint venture partner.

Kibali

The Kibali project is located approximately 560 kilometers northeast of the city of Kisangani and 150 kilometers west of the Ugandan border town of Arua in the northeast of the DRC. The Kibali project is controlled by a 50:50 joint venture, between Randgold and AngloGold Ashanti Limited, which holds a 90% interest in Kibali Goldmines SPRL. The company's interest in the Kibali project was acquired following the acquisition of Moto Goldmines Limited, in conjunction with AngloGold Ashanti, and the acquisition of a 20% interest from Okimo on behalf of the joint venture.

Exploration

The company has a portfolio of exploration projects in both West and Central Africa. It is exploring in 5 African countries with a portfolio of 250 targets on 13,624 square kilometers of groundholding.

History

Randgold Resources Limited was founded in 1995.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
