The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ReachLocal, Inc. business.

### **About ReachLocal, Inc.**

ReachLocal, Inc. provides online marketing and reporting solutions to small and medium-sized businesses (SMB). The company's operations are located in the United States, Canada, the United Kingdom, Australia, and India.

The company's solutions include search engine marketing, display advertising, remarketing and online marketing analytics. As of September 30, 2009, the company managed 17,600 Active Campaigns across 14,500 Active Advertisers.

### **Products and Services**

**ReachSearch:** The company's ReachSearch product is focused on assuring that its clients' advertisements appear among the search results when local consumers enter certain keywords on local search sites, such as Google, Yahoo!, and Microsoft. The RL Platform is directly integrated into the advertising platforms of these and other search engines through APIs. In addition, as part of the ReachSearch product, its SMB clients also receive placement in the search results of its network of online publishers and directory sites called the ReachLocal Search Network. This network provides additional qualified local traffic to the SMB and allows the SMB to reach potential customers across a range of sites.

**ReachDisplay:** The company's ReachDisplay product is primarily focused on maximizing the exposure for an SMB that wants to broadcast a message to a specific target online audience. The company offers approximately 20 different display advertising products across various publishing partners, including Yahoo!/Right Media, Google, Collective Media, Facebook, Fox Interactive Media and Kelly Blue Book.

**Remarketing:** The company's remarketing product allows it to target consumers who have previously visited a specific SMB client's Web site, either through a ReachSearch campaign or a ReachDisplay campaign.

**TotalTrack:** Each of the company's media products includes a tracking service powered by its proprietary reverse proxy technology that allows its clients to see exactly how much online and offline activity is generated by their online advertising campaigns.

## Competition

**Internet Marketing Providers:** The company competes with Internet marketing providers, such as Google, Yahoo!

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
