The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Realty Finance Corporation business.

About Realty Finance Corporation

Realty Finance Corporation operates as a commercial real estate specialty finance company. The company engages in originating and acquiring whole loans, bridge loans, subordinate interests in whole loans (B Notes), commercial mortgage-backed securities (CMBS) and mezzanine loans, primarily in the United States.

Investment Portfolio

Whole Loans: These loans are secured by commercial real estate assets in various industries. The company's primary focus initially is commercial properties in the office, retail, hotel, industrial, and apartment sectors. It also acquired seasoned loans in the secondary market secured by single assets and portfolios of performing and sub-performing loans originated by third-party lenders, such as banks, life insurance companies and other owners. These loans are secured by commercial properties throughout the United States.

Subordinate Interests in Whole Loans (B Notes): The company purchases from third parties and retains from whole loans it originated and securitized or sold, subordinate interests referred to as B Notes. B Notes are loans secured by a first mortgage and subordinated to a senior interest, referred to as an A Note.

Mezzanine Financing: The company invests in mezzanine loans that are senior to the borrower's common and preferred equity in, and subordinate to a first mortgage loan on, a property. These loans are secured by pledges of ownership interests, in whole or in part, in entities that directly or indirectly own the real property.

Commercial Mortgage-Backed Securities: The company acquires CMBS that are created when commercial loans are pooled and securitized. It would originate CMBS from pools of commercial loans.

Joint Venture Investments: The company manages its existing joint venture portfolio. The company's joint venture investment holdings involve the development, redevelopment or re-tenanting of all or a portion of the real estate assets in the retail, office, industrial, and multifamily sectors.

Other Real Estate-Related Investments: The company would make investments in other types of commercial real estate assets. These include acquisitions of real property, net leased property, distressed and stressed debt securities, RMBS, CDOs, and equity and debt issued by REITs or other real estate companies. It has authority to issue its common stock or other equity or debt securities in exchange for property.

REIT Tax Status

The company has elected to qualify to be taxed as a real estate investment trust (REIT). As a REIT, it would not be subject to the U. S. federal income tax provided it distributes at least 90% of its REIT taxable income to its stockholders.

History

The company was founded in 2005. It was formerly known as CBRE Realty Finance, Inc. and changed its name to Realty Finance Corporation in January 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
