company’s decision-making processes.

In the part that describes Red Hat, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company’s competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company’s business and sales activities will be boosted by gaining an insight into your competitors’ businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Red Hat, Inc. business.

About Red Hat, Inc.

Red Hat, Inc. provides open source software solutions to enterprises worldwide. The company offers a choice of operating systems and virtualization options for servers, work stations, mainframes and desktops that support multiple application areas, including the data center, cloud deployments, software as a service, edge-of-the-network applications, information technology infrastructure (applications, such as database, ERP. and Web servers), mainframe computing, corporate desktop, and technical/developer workstations. The company also provides other infrastructure enterprise technologies, including software development tools, clustering of systems and services, and directory services. It has operations in the Americas, EMEA (Europe, the Middle East, and Africa), and the Asia Pacific.

PRODUCTS AND SERVICES

The company's software solutions consist of Red Hat enterprise technologies, such as Red Hat Enterprise Linux, JBoss Enterprise Middleware, and Red Hat Enterprise Virtualization. Its services offerings, principally directed toward its medium and large enterprise customers and the hardware providers with whom it has strategic relationships, include technical support and maintenance, training, professional consulting services, engineering services, and hardware certification.

+44 20 8123 2220
info@marketpublishers.com

The company provides its enterprise technologies with related services in the form of annual or multi-year subscriptions. Its subscriptions include a bundle of services encompassing product delivery, problem resolution, ongoing corrections, enhancements and new versions, certified capability with a portfolio of hardware and software applications, and Red Hat's Open Assurance program. The subscriptions offer varying levels of support services as well as access to basic software updates and configuration management functionality via its integrated management technologies Red Hat Network (RHN), JBoss Customer Support Portal (JBoss CSP), Red Hat Network Satellite (RHN Satellite), and JBoss Operations Network (JBoss ON).

Red Hat Enterprise Linux technologies

Red Hat Enterprise Linux is an operating system built from various open source software packages, including the Linux kernel, and is designed for enterprise computing. Red Hat Enterprise Linux delivers the features required for commercial deployments, including support for a range of ISV applications from vendors, such as BMC Software, Inc. (BMC), CA, Inc. (CA), Hewlett-Packard Company (HP), International Business Machines Corporation (IBM), Microsoft Corporation (Microsoft), Oracle Corporation (Oracle), SAP AG (SAP), Sybase, Inc. (Sybase), and Symantec Corporation (Symantec); certification on multiple architectures and original equipment manufacturer (OEM) platforms, including Dell Inc. (Dell), Cisco Systems, Inc. (Cisco), Fujitsu Limited (Fujitsu), Fujitsu Siemens Computers (Holding) BV (Fujitsu Siemens), Hitachi, Ltd (Hitachi), NEC Corporation (NEC), HP, IBM, and Sun Microsystems, Inc., (Sun); technical support; stability based upon periodic upgrade cycles on a when and if available basis and multiyear support lifecycle; and virtualization capability incorporated into the core operating system.

Red Hat Enterprise Linux is generally offered in three configurations:

Red Hat Enterprise Linux—a base product server offering with virtualization support and a virtual guest offering for use with Red Hat or third-party hypervisors.

Red Hat Enterprise Linux Advanced Platform—a solution bundle that includes Red Hat Enterprise Linux, Red Hat Global File System and Red Hat Cluster Suite. Red Hat Enterprise Linux Advanced Platform targets customers who require an integrated virtualization solution.

Red Hat Enterprise Linux Desktop—an open source desktop offering.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
