term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Reed Elsevier NV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Reed Elsevier NV business.

About Reed Elsevier NV

Reed Elsevier NV provides professional information solutions in the science, medical, legal, risk, and business sectors in North America and Europe.

Segments

The company's businesses provide products and services that are organized in four business divisions: Elsevier; LexisNexis; Reed Exhibitions; and Reed Business Information.

ELSEVIER

Elsevier provides scientific and medical information and serves scientists, health professionals, and students worldwide. Elsevier provides information and workflow tools that enable customers to make critical decisions and improve outcomes.

Elsevier has its principal operations in Amsterdam, Beijing, Boston, Chennai, Delhi, London, Madrid, Munich, Oxford, New York, Paris, Philadelphia, Rio de Janeiro, St. Louis, San Diego, Singapore, and Tokyo.

Elsevier has two market facing businesses: Science & Technology serving the scientific community and Health Sciences serving the health community, both of which are supported by a global shared services organization which provides integrated editorial systems and production services, product platforms and distribution, and other back office functions.

Science & Technology

Science & Technology is a global provider of scientific information. It delivers an array of information and workflow tools that generate insights for researchers in the advancement of scientific discovery and improve the productivity of research. Its customers are scientists and professionals, academic libraries, corporations and governments, who rely on Elsevier: to provide content; to promote, review, publish, disseminate, and preserve research findings; and to create workflow tools.

Science & Technology publishes approximately 200,000 new research articles each year through approximately 1,100 journals, majority of which are the foremost publications in their field and a primary point of reference for new research. Science & Technology also publishes approximately 900 new book titles annually, as well as secondary material in the form of supporting bibliographic data, indexes and abstracts, and tertiary information through review and reference works. 10,000 e-book titles are in ScienceDirect, with approximately 400 e-books added each year.

Science & Technology's other primary electronic solutions include Scopus and the Reaxys and SciVal Spotlight services. Scopus is an abstract and citation database of research literature in the world, with the abstracts and bibliographic information of approximately 40 million scientific research articles from 17,000 peer reviewed journals and approximately 5,000 publishers. Scopus also has data on approximately 23 million patents. Reaxys is a new solution for synthetic chemists, based on Elsevier's prestigious CrossFire Database suite, which integrates chemical reaction and compound data searching with synthesis planning. The SciVal suite of research tools enables individual researchers and institutional leadership to determine and evaluate their research strategies.

Health Sciences

Health Sciences is a medical publisher, serving health professionals, including medical researchers, doctors, nurses, allied health professionals and students, as well as hospitals, research institutions, managed healthcare organizations, pharmaceutical

companies, and insurers. Through its medical journals, books, major reference works, databases and online information solutions, Health Sciences provides critical information and analysis on which its customers rely to base their decisions, to improve medical outcomes.

Health Sciences publishes approximately 700 journals, including on behalf of learned societies, and, in 2009, approximately 1,700 new book titles and clinical reference works both in print and through ScienceDirect and other electronic platforms, such as MDConsult, which is an online clinical information service with approximately 2,200 institutional customers and approximately 12 million page views per month. Primary titles include medical journals, such as The Lancet, and major medical reference works, such as Gray's Anatomy, Nelson's Pediatrics, and Netter's Atlas of Human Anatomy. The business also provide

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
