Regal Petroleum plc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Regal Petroleum plc and its competitors. This provides our Clients with a clear understanding of Regal Petroleum plc position in the **Energy Industry**.

- The report contains detailed information about Regal Petroleum plc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for Regal Petroleum plc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The Regal Petroleum plc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Regal Petroleum plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Regal Petroleum plc business.

About Regal Petroleum plc

Regal Petroleum plc (Regal or the company) is a London based independent oil and gas producer. Regal is focused on the exploration, development and production of oil and gas assets in Ukraine, Greece, and Romania.

Ukraine

Regal has a 75% interest in three license areas in the Dneiper-Donets basin 200km east of Kiev. This basin produces approximately 90% of Ukraine's gas and condensate. Regal is currently producing from three wells with all gas and condensate production sold locally.

Regal has four wells connected to the new gas plant: MEX3 and GOL1 (both work-over wells), together with GOL2 (a former exploration well completed by Regal as a production well) and MEX102 (a new well drilled by Regal). A further work-over well SV10 has been completed and awaits connection to the plant.

The drilling of production well MEX102 was completed in mid March 2004 and connected to the gas plant on 26 April 2004, following the installation of infrastructure and testing.

Additionally, in anticipation of commencing the exportation of gas from Ukraine in 2004, Regal completed a 13.2km high capacity export pipeline connecting the new gas plant to the international export trunk line to Western Europe. Daily production from the field is an average of 830,000m³ gas equivalent.

Romania

Regal has a 100% interest in two licenses totaling 10,388km² located in the highly prospective Moldavia Platform in northeast Romania. These concessions include the 4,103km² Suceava Block and the 6,285 km² Barlad Block. Five major leads (structures) have been identified following the digitising and modelling of seismic and well log data together with the analysis of all the technical information.

Greece

In 2003 Regal acquired a 57.7% stake in Kavala Oil S.A., an operator of oil, gas and sulphur production facilities in the North Aegean Sea in Greece. Kavala produces approximately 4,000 barrels of stabilized crude oil per day from Prinos and Prinos North, has exclusive development rights at Epsilon and exclusive exploration rights at Kallirachi. Independent studies of the Prinos, Prinos North and Epsilon fields have shown proven and probable recoverable oil reserves of 80MMbbls.

In December 2003 Kavala commenced the drilling of an exploration well at the Kallirachi prospect. This well was successfully drilled to a depth of 2,555 meters in January 2004 and the well confirmed the presence of sweet high quality oil in multi-layered sandstone pay zones.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
