## Abstracts

Reinsurance Technologies Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Reinsurance Technologies Ltd. and its competitors. This provides our Clients with a clear understanding of Reinsurance Technologies Ltd. position in the Industry.

The report contains detailed information about Reinsurance Technologies Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Reinsurance Technologies Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Reinsurance Technologies Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Reinsurance Technologies Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Reinsurance Technologies Ltd. business.

### **About Reinsurance Technologies Ltd.**

Reinsurance Technologies Ltd., a software product company, engages in the design, development, marketing, and support of Web-based software solution used by insurance and reinsurance companies to facilitate and support critical back-office business processes.

The company's reinsurance application is proprietary software for reinsurance management of reinsurance contract combinations throughout the entire reinsurance contract workflow, from assumed and ceded to retroceded business. Version 1 of the SurSITE product for reinsurance administration was designed and developed with the deployment of the product at its charter client. An improved version (v2.5) of the SurSITE solution was released in 2006.

SurSITE is a Technical Accounting Management Server (TAMS) application that automates calculations and generates transactions for premiums, commissions, and claims based on events and transactions at the original insurance policy level; it also manages statements of account, reinsurance recovery notices, and claims notifications. The company is designing support for facultative reinsurance used to insure risks that cannot be insured by a single insurance company, like property and liability insurance for multinational corporations, airlines and aerospace, cargo, energy, engineering,

manufacturers, ocean hull, etc.

The company's proprietary reinsurance software for reinsurance administration manages reinsurance contract combinations throughout the entire reinsurance contract workflow, from the primary insurance policy to the portions of the primary insurance policy that are reinsured. The company's SurSITE solution also generates statements of account, reinsurance recovery notices and claims notifications.

The company's SurSITE solution also offers a user real-time access to critical loss details by subsidiary by line of business by geographic location before and after applied reinsurance. In addition to its software product, the company offers consulting services to its customers with requirements studies, data migration, data integration tools, system integration, and other related professional services.

The company's initial multi-million dollar deployment and charter client is the Swiss Pool for Aviation Insurance (SPL), an insurance and reinsurance consortium based in Zurich, Switzerland consisting of 26 member companies, including among others, Allianz, Partner Re, Swiss Re, Winterthur Insurance Company and Zurich Insurance Group.

## Sales and Marketing

The company serves insurance groups, captive insurance companies, reinsurance companies, insurance and reinsurance consortia, and run-off and commutation markets. It markets its solution through direct sales to end-users and indirect sales through global alliance partners.

The company operates sales offices in four geographic regions that would cover markets, including - North America & U.S. Bermuda; Europe & U.K. Bermuda; Asia, including China & Japan; and Pacific Rim, including Australia & New Zealand.

## Competition

The company's competitors include – reinsurance product providers, such as Computer Science Corporation (CSC), SAP, 'Xchanging/RebusIS', Siebel and SunGuard; and professional service organizations, such as IBM, Accenture, Deloitte Consulting, EDS, BearingPoint and Cap Gemini Ernst & Young.

## History

Reinsurance Technologies Ltd. was founded in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
