In the part that describes RenaissanceRe Holdings Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of RenaissanceRe Holdings Ltd. business.

## **About RenaissanceRe Holdings Ltd.**

RenaissanceRe Holdings Ltd., through its subsidiaries, provides reinsurance and insurance coverages and related services to a range of customers primarily in the United States, Caribbean, Europe, Australia, and New Zealand.

### Segments

The company conducts its business through two segments, Reinsurance and Individual Risk.

#### Reinsurance Segment

The Reinsurance Segment includes three units, including property catastrophe reinsurance, primarily written through Renaissance Reinsurance Ltd and DaVinci Reinsurance Ltd. (DaVinci); specialty reinsurance, primarily written through Renaissance Reinsurance and DaVinci; and certain other activities of Ventures.

**Property Catastrophe Reinsurance:** The company provides property catastrophe reinsurance worldwide. Its primary property catastrophe reinsurance products include catastrophe excess of loss reinsurance and excess of loss retrocessional reinsurance.

**Catastrophe Excess of Loss Reinsurance:** The company principally writes catastrophe reinsurance on an excess of loss basis, which means it provides coverage to its insureds when aggregate claims and claim expenses from a single occurrence of a covered peril exceed the attachment point specified in a particular contract. Under these contracts the company indemnifies an insurer for a portion of the losses on insurance policies in excess of a specified loss amount, and up to an amount per loss specified in the contract. The coverage provided under excess of loss reinsurance contracts may be on a worldwide basis or limited in scope to selected geographic areas. Coverage can also vary from 'all property' perils to limited coverage on selected perils, such as 'earthquake only' coverage.

**Excess of Loss Retrocessional Reinsurance:** The company also writes retrocessional reinsurance contracts that provide property catastrophe coverage to other reinsurers or retrocedants. In providing retrocessional reinsurance, the company focuses on property catastrophe retrocessional reinsurance which covers the retrocedant on an excess of loss basis when aggregate claims and claim expenses from a single occurrence of a covered peril and from a multiple number of insureds exceed a specified attachment point. The coverage provided under excess of loss retrocessional contracts may be on a worldwide basis or limited in scope to selected geographic areas. Coverage can also vary from 'all property' perils to limited coverage on selected perils, such as 'earthquake only' coverage.

**Catastrophe-Linked Securities:** The company also invests in catastrophe-linked securities (cat-linked securities). Cat-linked securities are generally privately placed fixed income securities as to which all or a portion of the repayment of the principal is linked to catastrophic events.

### Specialty Reinsurance

The company writes various lines of reinsurance other than property catastrophe, such as catastrophe exposed workers' compensation, surety, terrorism, medical malpractice, casualty clash, certain other casualty lines and other specialty lines of reinsurance, which collectively referred to as specialty reinsurance. The company offers its specialty reinsurance products principally on an excess of loss basis, and also provides proportional coverage. In a proportional reinsurance arrangement (also referred to as quota share reinsurance and pro rata reinsurance); the reinsurer shares a proportional part of the original premiums and losses of the insured.

## Ventures

The company pursues various opportunities through its Ventures unit, which has responsibility for managing its joint venture relationships, executing customized reinsurance transactions to assume or cede risk and managing certain investments directed at classes of risk other than catastrophe reinsurance. It also provides customized weather and energy risk management solutions to various customers on a worldwide basis.

**Property Catastrophe Managed Joint Ventures:** The company manages property catastrophe-oriented joint ventures, which provide it with an additional presence in the market. The company's joint ventures include Top Layer Reinsurance Ltd. (Top Layer Re) and DaVinci. Renaissance Under

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
