Such information creates your awareness about principal trends of Resources Connection Inc. business.

About Resources Connection Inc.

Resources Connection, Inc. operates as a professional services company. The company provides services under the name Resources Global Professionals.

The company provides finance, accounting, risk management and internal audit, corporate advisory, strategic communications and restructuring, information management, human capital, supply chain management, actuarial and legal and regulatory services in support of client-led projects and initiatives.

Services and Products

The company delivers its services to clients across multiple service lines, including finance & accounting, information management, human capital, corporate advisory, strategic communications & restructuring services, legal & regulatory, internal audit & risk management, and supply chain management.

Finance & Accounting

The company's finance and accounting services encompass accounting operations,

financial reporting, internal controls, financial analyses and business transactions. Resources Global helps organizations to manage peak workload periods, add specific skill sets to certain projects, or have access to full project teams for a specific initiative. Project examples include shared service center migrations; finance transformation; restatements of previously issued financial statements; implementation of new accounting standards; post-merger and acquisition integration; external financial reporting and internal management reporting; financial analyses, such as product costing and margin analyses; remediation of internal control weaknesses; business process improvement; and interim accounting management roles, such as chief financial officer, controller and director of accounting.

In addition, the company assists with merger and acquisition projects, including divestitures and carve outs. Its finance and accounting consultants assist with the following functions for clients involved in divestitures and carve outs preparation of public filings related to the transactions; carve out audits; and providing subject matter experts to perform technical research of accounting transactions, implementations and interpretations of pronouncements of the Financial Accounting Standards Board (FASB).

Sitrick Brincko Group

Sitrick Brincko Group offers a combination of strategic counsel, tactical execution, and organizational and logistical support critical to companies undergoing restructuring and change. It offers various services to clients, including restructuring and reorganization; corporate and financial advisory; finance and capital sourcing; interim and crisis management; dispute resolution and litigation support; bankruptcy claims administration and management; and crisis and strategic communications.

Information Management

The company's information management practice provides planning and execution services in four primary areas, including program and project management, business and technology integration, data strategy and management, and IT strategy and governance. Its technology solutions include enterprise resource planning (ERP) systems, strategic front-of-the-house systems, HR information systems, supply chain management systems, core finance and accounting systems, audit compliance systems, and financial reporting, planning and consolidation.

The company's information management consultants work under the client's direction on various projects related to program & project management; business & technology

integration; data strategy & management; and IT strategy & governance.

Human Capital

Consultants in its human capital practice apply project management and business analysis skills to help solve the human resource aspects of business problems. The two primary areas of focus of its Human Capital practice are change management/business transformation and HR operations.

Legal & Regulatory

The company's legal & regulatory practice helps clients drive and execute their legal, risk management and regulatory initiatives. Its legal and regulatory consultants work at its clients' direction to support both routine initiatives and projects, as well as to augment their staff. Areas in which the company serves its client

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
