Abstracts

Retail Holdings N.V. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Retail Holdings N.V. and its competitors. This provides our Clients with a clear understanding of Retail Holdings N.V. position in the Industry.

The report contains detailed information about Retail Holdings N.V. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Retail Holdings N.V.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Retail Holdings N.V. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Retail Holdings N.V. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Retail Holdings N.V. business.

About Retail Holdings N.V.

Singer N.V. (Singer or the Company) was incorporated under the laws of the Netherlands Antilles in 1999. Effective September 2000, as a result of a successful reorganization under Chapter 11 of the United States Bankruptcy Code, Singer became the parent company of several operating companies (the Operating Companies) formerly owned by The Singer Company N.V. (Old Singer), as well as acquiring ownership of the SINGER® brand name, one of the most widely recognized and respected trademarks in the world.

The Company is a holding company and, through its Operating Companies, is engaged in two principal businesses, Retail and Sewing. The SINGER® trademark ties the two businesses together and also stands on its own with licensing and wholesaling potential. The Retail business consists primarily of the distribution through company-owned retail stores and direct selling of a wide variety of consumer durable products for the home in selected emerging markets, primarily in Asia, Mexico and the Caribbean. Retail sales activities in these markets are strengthened by the offer of consumer credit services provided by the Company to its customers. In some of the markets where it operates, Singer is recognized as a leading retailer of products for the home.

The Sewing business consists primarily of the distribution of consumer and artisan

sewing machines and accessories, produced by Singer and certain third-party manufacturers, through distribution channels operated by its Sewing Operating Companies and through third-party distributors and dealers, as well as through the Operating Companies which operate Singer's Retail business. Singer is one of the leading sellers of consumer and artisan sewing machines. The Company has a presence in more than 190 countries around the world, directly through its Operating Companies or indirectly through dealers, distributors and licensees.

Retail Business

In certain countries, primarily in Asia, Mexico and the Caribbean, Singer's Operating Companies have for many years been engaged in the distribution, through retail stores and direct selling, and in some markets through wholesale channels, of consumer durable products. In these countries, the SINGER® name is recognized by the consumer as a trusted source of reliable, quality products for the home at reasonable prices, as well as being identified with specific consumer products that may vary by market.

Products

In these countries, Singer is a retailer of various consumer durable products for the home. Products include: electronic equipment, such as televisions, mobile telephones, VCRs, stereos, CD, VCD and DVD players and portable radios; home appliances, such as refrigerators, gas ranges, washing machines, small kitchen appliances, dishwashers, dryers, sewing machines and ironing and pressing products; home furnishings, such as bedroom, dining room and occasional furniture; and additional consumer products depending on the market, such as motorcycles in Bangladesh and Thailand. In some cases the products are generic, and in other cases the products are selected to meet local consumer preferences. New types of products are reviewed and added to the local product offering on a regular basis.

All consumer durable products are sourced from third-party manufacturers (either in fully assembled or kit form), with the exception of sewing machines which are sourced through Singer's Sewing operations. Singer has maintained strong historical relationships with several leading manufacturers including Goldstar, Matsushita (Panasonic/National), Samsung, Sanyo and Sharp.

Principal Retail Operating Companies

Singer's principal Retail Operating Companies are located in the following countries:

Mexico

Singer's Retail Operating Company in Mexico is Singer Mexicana S.A de C.V. (Singer Mexicana), a 100%-owned subsidiary. Singer enjoys wide brand name recognition in Mexico. Singer Mexicana operates approximately 215 "Singer" Retail stores, selling a broad range of consumer durable products for the home. The stores, which are primarily located in non-urban areas, also serve as a base for canvassers who sell the same products at village market

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
