The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Revolution Technologies, Inc. business.

### **About Revolution Technologies, Inc.**

Revolution Technologies Inc., a development stage company, engages in the acquisition, exploration, and development of resource properties and new technologies in Canada.

#### Land Holdings

Ontario Wawa: The company holds Corbiere Township-4 claims totaling 4 square kilometers Iron rights only (Josephine Iron Mines Inc.); and Esquega Township-9 claims totaling 8.5 square kilometers Iron rights only.

Quebec: The company holds 14 claims in Baie-Comeau totaling 1625 acres; and 33 claims in Schefferville totaling 3500 acres (Josephine Iron Mines Inc.).

Manitoba Fox River: The company owns 108B-13,466 HA'S, land holdings totaling 32,000 acres.

Wawa Esquega: The claims cover 2000 acres adjacent to Klondike Gold Corp., 50% owned by Richard Hughes' Golden Chalis Resources Inc. (GCR-V), and 5 kilometers directly east of Dianor Resources Inc.'s (DOR-V) recent drill program on their major

diamond discovery in Chabanel Township.

Wawa- Corbier: This claims cover 1,000 acres and is located 4 kilometers northeast of Dianor's (DOR-V) major diamond discovery in Chabanel Twp.

Quebec, Baie Comeau: The company has staked 14 mining claims totaling 742 acres in two separate blocks located north of Baie-Comeau, Quebec.

Manitoba: The property in Manitoba covers approximately 32,000 acres of ground in the Fox River Claim and is situated in the Fox River Belt, at the margin of the geological province of Superior Province in Manitoba.

### Significant Events

The company entered into an agreement with Canada Iron Inc. ('Iron'), its wholly owned subsidiary, Chalice Diamond Corp. (Chalice), and Klondike Gold Corp. (Klondike). Under this agreement, the company assigned its 100% interest in 8 mining claims (the 'Esquega Property') held in Esquega Township equally to Chalice and Klondike; Chalice and Klondike assigned back to the company its 100% interest in the iron ore rights on the Esquega Property; Iron assigned its 100% interest in all mineral rights on the Corbiere Property, Wawa, Ontario (the 'Corbierre Property'), except for, the iron ore rights which will remain with Iron, equally to Chalice and Klondike; Chalice and Klondike transferred its 100% interest in 3 mining claims (the 'Chalice Property') located in Wawa, Ontario, to Iron; and Iron assigned back 100% interest in all non-iron ore rights in the Chalice Property equally to Chalice and Klondike.

### History

Revolution Technologies Inc. was incorporated in 1979. The company was formerly known as Geophysical Prospecting Inc. and changed its name to Revolution Technologies Inc. in March 2008.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
