The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of REX American Resources Corporation business.

About REX American Resources Corporation

REX American Resources Corporation engages in alternative energy and real estate businesses.

Operations

Alternative Energy

The Alternative Energy segment includes investment in entities, which operates ethanol production facilities. As of January 31, 2010, the company invested in four entities that owned and operated six ethanol production facilities. Its ethanol plants would produce approximately 2.8 gallons of ethanol for each bushel of grain processed in the production cycle. Its ethanol investments consist of:

Levelland Hockley County Ethanol, LLC (Levelland Hockley): Levelland Hockley, which is located in Levelland, Texas, has a plant, which has a nameplate capacity of 40 million gallons of ethanol and 135,000 tons of dried distillers grains (DDG) per year. The company owns 56% interest in Levelland Hockley.

Big River Resources, LLC (Big River): Big River is a holding company for various entities, including Big River Resources West Burlington, LLC which operates a 92 million gallon dry-mill ethanol manufacturing facility in West Burlington, Iowa. Big River completed construction of its second plant which has a nameplate capacity of 100 million gallons of ethanol and 320,000 tons of DDG per year. This plant is located in Galva, Illinois. In 2009, Big River acquired a 50.5% interest in an ethanol production facility which has a nameplate capacity of 100 million gallons of ethanol and 320,000 tons of DDG per year. The plant is located in Dyersville, Iowa. The company has an effective 5% ownership interest in this entity.

Patriot Renewable Fuels, LLC (Patriot): Patriot has a plant, which is located in Annawan, Illinois and has a nameplate capacity of 100 million gallons of ethanol and 320,000 tons of DDG per year. It owns 23% interest in Patriot.

One Earth Energy, LLC: The company owns 74% of the outstanding membership units of One Earth Energy, LLC (One Earth). One Earth completed construction of its ethanol production facility in Gibson City, Illinois. The plant has a nameplate capacity of 100 million gallons of ethanol and 320,000 tons of DDG per year.

Real Estate

The Real Estate segment includes owned and sub-leased real estate, including those previously used as retail store and distribution center operations, its real estate sales, and leasing activities.

As of April 30, 2010, the company had lease or sub-lease agreements, as landlord, for all or parts of 10 former retail stores (108,000 square feet leased and 35,000 square feet vacant). It has 30 owned former retail stores (374,000 square feet), and 1 former distribution center (180,000 square feet), that were vacant as of April 30, 2010. The company is marketing these vacant properties for lease or sale.

Dispositions

During 2009, the company exited its retail business.

History

The company was founded in 1980. It was formerly known as REX Stores Corporation

and changed its name to REX American Resources Corporation on June 10, 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
