The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Richmond Mines Inc. business.

About Richmond Mines Inc.

Richmont Mines Inc. engages in the acquisition, exploration, development, and operation of mineral properties in northeast Canada.

Beaufor Mine

The Beaufor Mine property along with other adjacent properties, such as Pascalis, Perron, Colombiere, Courvan and Perron Blocks 2, 3, and 4, are located approximately 27 kilometres to the northeast of the town of Val-d'Or, in the Abitibi-Est County, in the Province of Quebec, Canada.

The property, which includes the Mineral Reserves and Resources of the Beaufor Mine, consists of a series of adjacent mining rights subdivided into four projects, including Perron, Beaufor, Pascalis, and Colombiere. The projects consist of 2 mining leases, 1 mining concession and 23 claims approximately a total area of 591.5 hectares (ha). The Courvan project and Perron blocks 2, 3, and 4 form another group of mining titles. This group consists of 2 mining concessions and 66 claims, approximately a total area of 1,298 ha.

Island Gold Mine

The Island Gold Mine is located approximately 85 kilometers northeast of Wawa, Ontario, Canada, in the Sault Ste. Marie Mining Division. The Island Gold property consists of 137 patented, leased and staked claims totalling 4,684 ha.

The company has a 75% interest in the Edwards property, a group of 39 claims covering an area of approximately 694 hectares. This property is located to the east of the Island Gold property.

The Ego property, which is a group of 3 claims covering an area of approximately 73 hectares, and is located west of the Island Gold property.

Exploration Projects and Other Properties

The company owns or holds interests in mining properties at different stages of exploration.

Valentine Lake, Newfoundland, Canada: The Valentine Lake Property is located in Central Newfoundland. The property can be accessed by a 75 kilometers long gravel road from Millertown, via the Buchans Highway. The Valentine Lake property consists of 4 grouped mineral exploration licences covering a total area of 13,475 hectares and a total of 539 claims.

Wasamac, Quebec, Canada: The Wasamac property is located approximately 15 kilometers southwest of Rouyn-Noranda, Province of Quebec. The Wasamac property consists of 3 mining concessions (CM 349, CM 364, and CM 370) and 1 claim which represents a total area of 759.36 hectares in the Beauchastel Township. Richmond Mines owns 100% of the mining concessions relating to the Wasamac property. In 2009, 2 drill holes were completed for a total of 513 metres on the Wasamac property.

Francoeur Project, Quebec, Canada: The Francoeur property is located approximately 25 kilometers southwest of Rouyn-Noranda, Province of Quebec. The Francoeur property consists of 13 mining claims, including 3 mining concessions and 4 mining leases, covering a total surface area of 363 hectares. These claims are located in Beauchastel Township and are wholly owned by Richmond Mines.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
