The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Rio Vista Energy Partners LP business.

About Rio Vista Energy Partners LP

Rio Vista Energy Partners L.P. engages in the acquisition, development, and production of oil and natural gas properties, and related midstream assets.

Regional Enterprises

In 2007, the company acquired the business of Regional Enterprises, Inc. The principal business of Regional is storage, transportation and railcar transloading of bulk liquids, including chemical and petroleum products owned by its customers. Regional utilizes its fleet of 32 tractors and 48 tankers to distribute the various products it receives, as well as to perform direct hauling operations on behalf of its customers.

Transportation: The company transports a range of hazardous and non-hazardous liquid products, including the following: aluminum sulfate solution, sulfuric acid, sodium hydroxide, hydrogen peroxide, ferric chloride, ferric sulfate, hypochlorite solution, hydrochloric acid, ferrous chloride and aqua ammonia. The company's transportation services are provided within the states of Virginia, North Carolina, South Carolina, Georgia, Tennessee, Maryland, Pennsylvania, and Delaware.

The company has a fleet of approximately 48 tanker units and 32 tractors to its

transportation services. The majority of tankers are constructed of stainless steel, with 11 being rubber or chlorobutyl lined, which enables them to carry the corrosives. The tanker fleet also includes four aluminum-constructed tanks, which are equipped with vapor recovery. The tractor fleet consists of late model, Western Star and Mack units.

Storage: The company's Hopewell facility has 15 tanks, 6 of which have capacities in excess of one million gallons; of these 15 tanks, 13 tanks are for customer utilization. These tanks have a combined storage capacity of approximately 10.4 million gallons. As of December 31, 2008, the company had two vacant tanks with a combined storage capacity of 76,000 gallons. Regional stored the following products: two grades of asphalt, asphalt additive, sodium hydroxide, and oil.

Transloading: The company provides transloading services utilizing its rail siding and off-loading facilities to transfer products from railcars to tanker trucks. The company has two transloading facilities. Switching operations for the Johnson City, Tennessee facility are provided by East Tennessee Railway, which services tracks over which both the CSX and Norfolk Southern railroads operate.

Customers

The company's major customers include Suffolk Sales, General Chemical Corporation and Kemira Chemicals Canada Inc.

History

Rio Vista Energy Partners L.P. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
