Such information creates your awareness about principal trends of Rocketinfo, Inc. business.

About Rocketinfo, Inc.

Rocketinfo, Inc. provides embedded search tools and services to third party search engines, portals, and software vendors for use in customer relationship management, business intelligence, and financial services applications.

The company's infomediary services include a combination of search technologies, proprietary approaches to the extraction of business information, and various delivery tools. Rocketinfo search engine draws from the company's continuously updated index of approximately 16,000 Internet sites, 80,000 RSS, and Weblog sources, as well as client-defined content channels.

The company's technology provides software tools that index categorize the extract key concepts, data from news, and business information. Its search engine system includes Web robots, data storage, search definition, retrieval, and document ranking systems. The search engine system components work together providing the tools to scrape, index, and compress network based unstructured/structured data at regular intervals. Web based and application programming interfaces (XML, SOAP) allow for search query submission. The company's document rank subsystem yields results using a combination of keyword and parametric analysis.

Embedded Search Products

The company's business model in the embedded search products area is to continue to license embedded search tools, content, and services to application software vendors on volume-use (CPM) or per-seat basis.

Consumer Products

RocketNews.com: RocketNews is a news search engine on the Internet (www.rocketnews.com). Powered by Rocket's main search technology, the public site provides a software-driven breaking news portal updated every 15 minutes. Users are able to search for news from 16,000 Internet news sites, using a combination of Boolean expressions and parametric controls. It handles various million search requests a month, using a cluster of Intel-based Dell servers.

Rocketinfo RSS Reader: The company has developed a Web-based RSS Reader capable of managing and viewing various feeds for each individual user. The RSS Reader is able to process RSS feeds published in the 0.91, 1.0, and 2.0 standards, as well as the newer ATOM publishing standard. The reader enables search tools for finding RSS feeds and the ability to create personalized feeds. The company's RSS Reader has been deployed as a free service (reader.rocketinfo.com).

Rocketinfo Desktop: The company has been developing and testing the RocketNews Desktop, a free desktop search tool with embedded advertisements. It introduced the preliminary version of 'researcher' product to its rocketnews.com.

History

Rocketinfo, Inc. was founded in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
