## Abstracts

Rofin-Sinar Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Rofin-Sinar Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Rofin-Sinar Technologies Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Rofin-Sinar Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Rofin-Sinar Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Rofin-Sinar Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Rofin-Sinar Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Rofin-Sinar Technologies Inc. business.

### **About Rofin-Sinar Technologies Inc.**

Rofin-Sinar Technologies Inc. engages in the design, development, engineering, manufacturing, and marketing of laser-based products, primarily used for cutting, welding, and marking a range of materials.

#### **Laser Products**

The company offers a range of laser products and related services for three principal material processing applications: cutting, welding, and surface treatment (macro applications); marking; and fine cutting, fine welding, micro drilling, and micro structuring (micro applications).

The laser sources sold by the company consist of a laser head (containing the lasing medium, resonator, source of excitation, resonator mirrors, and cooling mechanism), power supply, and microcontroller (for control and monitoring).

#### **Laser Macro Products**

The company's XL, STS, FH, and Series fast-axial flow CO<sub>2</sub> lasers are used for both

cutting and welding applications and are marketed under the PRC and NELC brand. XL, STS, FH, and Series products are used primarily by the machine tool industry.

The company's SC Series diffusion cooled, wave-guide CO<sub>2</sub> lasers are developed and produced by Rofin-Sinar the U.K. Ltd. The SC Series are sealed-off lasers, which are also based on the Slab laser principle used for the DC Slab Series. These lasers are used mainly for cutting and structuring applications. Principal markets are the machine tool, automotive, and packaging industries.

Rofin's DS/LY Series of continuous wave lasers are designed for use with fiber-optic beam delivery systems, making them suited for integration into complex production systems for cutting and welding applications.

### Laser Marking Products

The company offers standardized and customized laser marking systems in different power ranges and wavelengths for use in various industrial segments. The company's laser marking products incorporate value-added software – VisualLaser Marker and LaserCAD – that provide the customer full control of the laser marking process.

PowerLine/StarMark Series – The company's standard PowerLine and StarMark laser marking products consist of a range of lasers with output power from 2 watts to 100 watts with a galvo-head, a personal computer with processor and Rofin's proprietary VisualLaserMarker and LaserCAD software.

MultiScan VS – This vector scanning marker utilizes a 100 watts sealed-off CO<sub>2</sub> laser and features the ability to mark components that are moving at high speeds. The main application is the marking of consumer goods in the packaging industry.

LabelMarker Advanced – This laser-based system is Rofin's solution when it comes to concerning speed in the process of label marking.

LabelMarker Compact – The user interface with an integrated touch panel provides for routine operation and the selection of pre-defined marking layouts. The LabelMarker Compact operates with thermoelectric cooling. A network interface is available for integration into production control networks.

EasyMark – The EasyMark is a class 1 transportable desktop device. The EasyMark offers a program-controlled z-axis and a rotary axis which can optionally be integrated.

EasyJewel – The EasyJewel is a transportable desktop device developed to mark jewelry. The laser system offers the benefits of non-contact, abrasion-resistant, permanent marking onto almost any type of precious material with precision.

CombiLine Flexible/CombiLine Advanced – These compact laser workstations have been designed for small and medium-size batches. They integrate a range of Rofin laser markers depending on the customer's specific application.

#### Laser Micro Products

StarWeld Series – Rofin's standard StarWeld laser products consist of pulsed lasers in the range of 40 watts to 500 watts. The StarWeld Series has a variety of possible applications, its main application is the fine welding of jewelry, electronics, and dental parts.

StarPulse Series – The StarPulse Series consists of pulsed Nd:YAG rod lasers with power ratings from 40 to 90 watts. StarPulse lasers are designed for use in fine welding applications, such as laser welding of reflective materials in the medical device and electronics industry.

StarFiber Series – The fiber laser

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
