Abstracts

Rosetta Resources, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Rosetta Resources, Inc. and its competitors. This provides our Clients with a clear understanding of Rosetta Resources, Inc. position in the [Energy](#) Industry.

The report contains detailed information about Rosetta Resources, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Rosetta Resources, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Rosetta Resources, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Rosetta Resources, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Rosetta Resources, Inc. business.

About Rosetta Resources, Inc.

Rosetta Resources Inc., an independent oil and gas company, engages in the acquisition, exploration, development, and production of oil and gas properties in the United States.

As of December 31, 2009, the company had an estimated 351.1 billion cubic feet equivalent of proved oil and natural gas reserves, including 296.8 billion cubic feet of natural gas, 3,825 thousand barrels of oil and condensate and 5,221 thousand barrels of natural gas liquids (NGLs).

Operating Areas

The company owns core producing and non-producing oil and natural gas properties in proven or prospective basins that are primarily located in California, the Rockies, and South Texas. It also has non-core positions in the state Waters of Texas and the Gulf of Mexico. For the year ended December 31, 2009, the company drilled 43 gross and 36 net wells.

California

As of December 31, 2009, the company owned approximately 60,000 net acres in the Rio Vista Field and other fields in the Sacramento Basin areas.

Rio Vista Field: The Rio Vista Gas Unit and a significant portion of the deep rights below the Rio Vista Gas Unit, which together constitute the greater Rio Vista Field, is the onshore natural gas field in California. The company produces from behind-pipe reserves in multiple zones at depths ranging from 2,000 feet to 11,000 feet in the field.

Rockies

As of December 31, 2009, the company owned approximately 160,000 net acres in the Rockies and had approximately 230,000 net acres under an exploration option in the Alberta Basin of Montana. Its production is concentrated in three basins: the DJ Basin, San Juan Basin, and Greater Green River Basin. In 2009, the company drilled five gross wells.

DJ Basin, Colorado: As of December 31, 2009, the company had a majority working interest in approximately 94,000 net acres with 154 square miles of 3-D seismic data.

San Juan Basin, New Mexico: The San Juan Basin is a prolific gas basin in North America, with significant contribution coming from the Fruitland Coal Bed Methane (CBM) trend. There is CBM production from depths of 1,600 feet surrounding its leasehold. As of December 31, 2009, the company had a 100% working interest in approximately 16,000 net acres. In 2009, the company drilled 3 CBM wells.

Pinedale, Wyoming: The company owns a 100% working interest in 1,280 acres of the Pinedale field. It own 28 productive natural gas wells and 1 salt water disposal well. The Pinedale field covers 1,280 acres.

Alberta Basin, Montana: The Alberta Basin play is a westward analog of the industry's Bakken and Three Forks plays of the Williston Basin of Montana and North Dakota. As of December 31, 2009, the company's acreage position included approximately 240,000 net acres, including approximately 230,000 net acres under exploration option agreements.

South Texas

As of December 31, 2009, the company owned approximately 170,000 net acres in South Texas. The company's production in South Texas comes from the Lobo, Olmos,

and Perdido sand trends and the Eagle Ford Shale trend. In 2009, the company drilled 31 gross wells, of which 25 were successful.

Lobo Trend: The company is a producer in the South Texas Lobo Trend, with 470 square miles of 3-D seismic and 255 operated producing wells. Its working interests range from 50% to 100%. In 2009, the company drilled 27 gross wells, of which 21 were successful. The Lobo trend produces from tight sands with low permeabilities and high pressures at depths from 7,500 to 10,000 feet.

Eagle Ford Shale Trend: The company focuses on the Eagle Ford Shale trend in South Texas. In 2009, it drilled four gross wells to gather and evaluate the shale with core and log data.

Olmos Trend: The company owns a 70% non-operated working interest in 231 gross producing Olmos wells in the Olmos trend of South Texas.

Perdido Sand Trend: The company owns a 50% non-operated working interest in the South Texas Perdido Sand trend. It has 37 producing wells (24 horizontal and 13 vertical).

Dinn Sand Trend: The company owns a significant acreage position with approximately 100% operated working interest adjacent to its existing Perdido development trend.

Other Onshore

In the Other Onshore region, the company has approximately 12,000 net acres under lease with an average non-operated working interest of 47%.

Texas State Waters

The company owns a 50% operated working interest through a joint venture in Sabine Lake, within Texas State Waters of Jefferson County and Louisiana State Waters of Cameron Parish, and additional non-operated properties in Texas State Waters near Nueces Bay. During 2009, the company drilled three gross wells. As of December 31, 2009, the company held interests in approximately 4,000 net acres with 72 square miles of 3-D seismic data.

Gulf of Mexico

Federal Waters: The company owns working interests in 12 offshore blocks ranging from 20% to 100% working interest with approximately 28,000 net acres.

Customers

The company's major customer is Calpine Energy Services.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
