## Abstracts

Royal Standard Minerals Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Royal Standard Minerals Inc. and its competitors. This provides our Clients with a clear understanding of Royal Standard Minerals Inc. position in the [Metals and Mining Industry](#).

The report contains detailed information about Royal Standard Minerals Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Royal Standard Minerals Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Royal Standard Minerals Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Royal Standard Minerals Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Royal Standard Minerals Inc. business.

### **About Royal Standard Minerals Inc.**

Royal Standard Minerals Inc., an exploration stage company, engages in the location, acquisition, exploration, and development of gold and precious metal deposits in the state of Nevada and coal in the state of Kentucky.

#### Properties

The company owns a 100% interest in projects in three gold-silver districts in Nevada. These projects include the Goldwedge project in Nye County, Manhattan District project; the Pinon and Dark Star projects in Elko County; the Fondaway Canyon and Dixie-Comstock projects in Churchill County; and the Campton project in Wolfe County, Kentucky.

#### Nevada Projects

**Goldwedge Project:** The Gold Wedge Project is located in the Manhattan Mining District in Nye County, Nevada. The company has entered into an option agreement for patented and unpatented mining claims in the Manhattan Mining District located in Nye County, Nevada. The land package totals approximately 1600 acres (4 patented and 70

unpatented claims). In addition, the company's option includes the Dixie-Comstock claim group located in Churchill County, Nevada. The Dixie-Comstock is a 1500 acre property.

**Pinon and Dark Star Projects-Carlin Trend South:** The Pinon property is located in the southeast end of the famous 'Carlin Gold Trend' approximately 10 miles south of Newmont's Rain mine, 25 miles southwest of Elko, Nevada. The Pinon property consists of a contiguous land block of 39 unpatented mining lode claims. The Pinon land position covers an area of approximately 2,720 acres (approximately 1101 hectares). The Pinon and Darkstar projects include approximately 8,000 acres comprising unpatented BLM lode mining claims, patents and leased fee lands.

**Fondaway Canyon Project:** The 100% controlled Fondaway Canyon gold project is located in Churchill County, Nevada in the Stillwater range. The Fondaway Canyon property consists of 148 contiguous unpatented lode-mining claims (approximately 3000 acres) on BLM land held under a lease agreement assigned from Nevada Contact Inc. (NCI) to Royal Standard Minerals Inc. (RSM).

### Kentucky Project

The company has acquired a 100% interest in a surface mine coal project in Wolfe County, Kentucky. The property consists of approximately 1,000 acres of coal mineral rights under lease. The Campton Coal Project is approximately 5 miles southeast of the Town of Campton adjacent to a paved highway 15 and is situated in Wolfe County. Within Wolfe County, the company holds mining interests from seven properties, containing six coal seams capable of production, namely Vires, Grassy, Cannel City, Whitesburg, Fire Clay, and Fire Clay Rider. The Campton mine is made up of seven separately owned land parcels having coal mining rights by all methods, aggregating 974 acres. Of the 1,000 acres, 272.19 acres are permitted for surface mining.

### History

Royal Standard Minerals Inc. was founded in 1986.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
