Abstracts

Russel Metals Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Russel Metals Inc. and its competitors. This provides our Clients with a clear understanding of Russel Metals Inc. position in the [Wholesale and Distribution](#) Industry.

The report contains detailed information about Russel Metals Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Russel Metals Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Russel Metals Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Russel Metals Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Russel Metals Inc. business.

About Russel Metals Inc.

Russel Metals Inc. operates as a metals distribution company in North America. The company's network of metals service centers carries a line of metal products, including carbon hot rolled and cold finished steel, pipe and tubular products, stainless steel and aluminum. The company purchases these products primarily from North American steel producers, and package and sell them to end users.

The company's energy tubular products operations carry a specialized product line focused on the needs of its energy industry customers. These operations distribute oil country tubular goods (OCTG), line pipe, tubes, valves and fittings from five Canadian and two U.S. locations. The company purchases these products either from the pipe processing arms of North American steel mills or from independent manufacturers of pipe and pipe accessories.

Metals Service Centers

The company's metals service centers sell plate, flat rolled carbon and other general line carbon steel products, as well as some stainless steel, aluminum and other non-ferrous specialty metal products in a range of sizes, shapes and specifications. General line steel products consisting of plate, structurals, bars, sheet, pipe, tubing and hollow

structural steel tubing, are used by end users in a wide variety of industries. Within Canada, its metals service centers operate under the names Russel Metals, Métaux Russel, A. J. Forsyth, Acier Leroux, Acier Loubier, Acier Richler, B&T Steel, Leroux Steel, Mégantic Métal, Métaux Russel Produits Spécialisés, Russel Metals Specialty Products, McCabe Steel, Russel Leroux, and York-Ennis.

The company's U.S. service center operations are conducted under the names Russel Metals Williams Bahcall, JMS Russel Metals, Norton Metals and Baldwin International. The Russel Metals Williams Bahcall operation focuses primarily on the distribution of general line carbon products through three facilities in Wisconsin. The JMS Russel Metals operations distribute carbon steel and non-ferrous products from seven facilities located in Alabama, Arkansas, Georgia, Kentucky and Tennessee. Norton Metals, a division of JMS Russel Metals focuses primarily on general line steel products in Texas. Baldwin International distributes specialty alloy products through its facility in Ohio.

The company's metals service centers also provide customized processing services to satisfy specifications established by end users. The company's value-added processes include, but are not limited to: shearing, slitting and cutting to length: the cutting of metal into smaller pieces or into narrower coils; laser, flame and plasma cutting: the cutting of metal to produce various shapes or parts according to end user supplied drawings; leveling: the flattening of metal to uniform tolerances for proper machining; tee-splitting: the splitting of metal beams; edge trimming: removing a portion of the edges of coiled metal to produce uniform width and round or smooth edges; and cambering: the bending of structural steel to improve load-bearing capabilities.

The company's metals service centers operations provide products and services to end users in various industries, including machinery and equipment manufacturing, construction, shipbuilding and natural resources, such as mining and petroleum.

Energy Tubular Products

The company's energy tubular products operations distribute oil country tubular goods, line pipe, tubes, valves and fittings primarily to the energy industry. This segment consists of five businesses, each of which sells a distinct line of products. These businesses include:

Fedmet Tubulars: It is a distributor of oil country tubular goods (which includes casing and tubing), line pipe and related products for use in oil and gas production and distribution. Fedmet Tubulars' sales office is located in Calgary, Alberta.

Triumph Tubular & Supply: It is a distributor of oil country tubular goods for use in oil and gas production and distribution. Triumph's sales office is located in Calgary, Alberta.

Comco Pipe and Supply Company: It is a distributor of pipe, valve and fitting products. Comco Pipe and Supply specializes in the supply and distribution of pipe and fluid handling products to the energy, construction, manufacturing, pulp and paper and mining industries. Comco Pipe and Supply is heavily involved in the distribution of pipe products for the oil sands of Northern Alberta. These products are distributed through facilities in Calgary and Edmonton, Alberta; Stonewall, Manitoba; and Guelph and Sarnia, Ontario.

Pioneer Pipe: It is a distributor and processor of steel pipe products to the construction, oil and gas and ski industries in the western the United States. Pioneer Pipe has facilities in Aurora, Colorado and Lindon, Utah.

Spartan Steel Products: It is a supplier of steel pipe products mainly to the energy sector is headquartered in Evergreen, Colorado. The energy tubular products businesses sell a range of products to end users located primarily in western Canada and the western the United States.

Significant Events

Norton Metal Products Acquisition: In November 2008, the company purchased 100% of Norton Metal Products, Inc., which is a general line metals service center located in Fort Worth, Texas operating under the name Norton Metals.

History

Russel Metals Inc. was founded in 1929.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
