Abstracts

R'Vibrant, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between R'Vibrant, Inc. and its competitors. This provides our Clients with a clear understanding of R'Vibrant, Inc. position in the Wholesale and Distribution Industry.

The report contains detailed information about R'Vibrant, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for R'Vibrant, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The R'Vibrant, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes R'Vibrant, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of R'Vibrant, Inc. business.

About R'Vibrant, Inc.

Nebo Products Inc 's business commenced in 1996, operated first as a partnership and then as a limited liability company, and was incorporated in 1998, in the state of Utah as Open Sea Corporation. The Company supplies hand tools and weekend camping gear to U.S. retailers. Most of its products are manufactured in Taiwan, the People's Republic of China, and India and are imported by the Company to the United States for sale under the Company's trademark NEBO or under retailers' own private labels. The Company has established business relationships and a working history with 15 Far East manufacturers, three shipping companies, and more than 5,000 customers nationwide, including The Home Depot, Menard's, Sears, Gander Mountain, Sportsman's Warehouse, The Sportsman's Guide, and Cabela's.

In 2001, the Company introduced the new Ultra[™] Socket Tool at the National Hardware Show in Chicago, Illinois, and received a Best of Show Award of Distinction for the marketing of innovative products selected by the show's Retailers' Choice Awards Committee for Do It Yourself Retailing.

Products

Top-selling hardware products include the following:

NEBO 13-in-1 screwdriver: This is a handheld multi-bit ratcheting screwdriver with 12 bits and a magnetic extension held in a cartridge that is stored in the handle. The NEBO 13-in-1 comes in three colors and continues to be one of the best multi-bit screwdrivers in the marketplace.

Speed Reader and Speed Reader PRO Tape Measures: These are rubber-grip, impact resistant tape measures. They have fractional markings to 1/32" and stud and truss markings indicated on the tape. Every 1/8" is printed with the actual fractions, making the tape easier to read.

NEBO-X Safety Glasses: This is a line of style-oriented protective eyewear with interchangeable lenses. The lenses are produced in different shades and styles to be marketed to a variety of user types. They have adjustable frames and come with a neck strap as an accessory. The Company holds U.S. Design Patent No. D425,926 on May 30, 2000, for protective eyewear for this product. These glasses comply with OSHA requirements for industrial eyewear. The Company sells these glasses under its own brand name and under private labels with the Craftsman® brand name for Sears.

Ultra[™] Socket: This is a complete socket set in one handy tool designed with a bidirectional ratcheting drive that also adjusts for three different drive angles. This product comes packaged with seven different sockets, six of which are stored inside the handle.

Hammers: The Company has completed its line of hammers including the 24 oz. all-steel framing hammer; the 21 oz. hickory straight or curved handle framing hammers; and 20 oz., 16 oz., and 8 oz. hammers. These hammers are designed for professional users and do-it-yourselfers.

Expandable levels: In 2002, the Company acquired the assets of Straightway®Tools and relocated the manufacturing of these levels from the United States to China. There are two levels currently available in this product line, the ComPac 4', which is a two-foot level that expands to four feet, and the ComPac 8', which is a four-foot level that expands to eight feet.

Top-selling outdoor products include the following:

The Bear and Moose sleeping bag lines: These sleeping bags are rectangular in shape, but come with a "mummy" style hood. This unusual design experienced immediate sales success and garnered industry attention. These sleeping bag lines are intended to

fulfill the mid-range camping market and have recently been sold into several large chains, catalog companies, and in various sporting and specialty stores throughout the United States. They are produced in various temperature ratings, colors, and fabrics.

The Wasatch and Teton sleeping bag lines: These lines are designed in the classic "mummy" style. The Teton utilizes an unusual curved zipper designed to facilitate zipping from inside the sleeping bag. Styles from both lines have recently sold into the same markets mentioned in the preceding paragraph. They are manufactured in an assortment of colors, temperature ratings, and fabrics.

The Sandstone sleeping bag

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?
Rare?
Costly to imitate?
Organized properly?
