The Saba Software, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Saba Software, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Saba Software, Inc. business.

About Saba Software, Inc.

Saba Software, Inc. provides a software platform for enterprise learning, collaboration, performance, and talent management. In addition, the company provides license updates and product support, implementation, training, and consulting services.

Products and Services

The company offers the Saba Enterprise Suite, the Saba Centra product suite, and a range of professional, education, and customer support services. Its solutions are available to customers through its OnDemand service offering or through its on-premise software product license.

Saba Enterprise Suite

Saba Learning Suite: An enterprise learning and learning content management solution that gives organizations and their people the tools they need to develop skills and competencies.

Saba Performance Suite: Enables organizations to align people's daily activities with key organizational goals and establish a relevant performance review process that

clarifies expectations and improves accountability.

Saba Talent Suite: Enables organizations to proactively plan for successions, as well as identifying, developing, tracking, and managing future leaders.

Saba Foundation: Delivers a profile that offers a common view of employee skills, interests, and experience, providing visibility into the impact of Human Capital Management (HCM) initiatives and business results, as well as how well people are aligned to the goals of the organization.

Saba Collaboration: Facilitates enabled learning and knowledge transfer between individuals and subject matter experts in informal settings or in conjunction with learning events and allows the organization to build and manage communities of practice, create repositories of institutional knowledge, and use the collective intelligence of the workforce for people management. Saba Collaboration includes tools, such as chat rooms, threaded discussions, wikis and document sharing, and is integrated with Saba Centra to allow creation of knowledge assets based on Web conference sessions that build the organization's knowledge base over time.

Languages: The Saba Enterprise Suite is available in the following languages: American English, Brazilian Portuguese, British/International English, Canadian French, Continental French, Continental Spanish, Danish, Dutch, Estonian, German, Greek, Hungarian, Indonesian (Bahasan), Italian, Japanese, Korean, Latvian, Lithuanian, Mexican Spanish, Norwegian, Polish, Russian, Simplified Chinese, Swedish, Turkish, and Traditional Chinese.

Saba Learning Suite

The Saba Learning Suite is a family of products designed to deliver configurable, targeted functionality in a single solution that addresses five key enterprise learning areas, including regulatory compliance, which allows a regulated organization to track required certifications and qualification programs and respond to compliance audits; sales and channel readiness, which enables sales organizations to gain the skills and knowledge required to build a sales pipeline and win business for new offerings; channel certification, which manages certification of channel partners to drive representation of an organization's products and brands; customer education, which supports an organization's ability to improve customer loyalty through the sale and distribution of training; and corporate universities, which provides the ability to develop employees' skills and competencies to execute organizational objectives.

The Saba Learning Suite combines enterprise learning with collaboration for formal and informal learning, synchronous learning, analytics, and content creation and management. It also provides support for blended learning and is available in 26 languages for global deployment. The Saba Learning Suite is also integrated with Saba Centra for virtual classroom and informal learning. The Saba Learning Suite includes the following applications:

Saba Learning: Enables global organizations to deliver and manage critical knowledge and skills; supports certifications with multiple learning pathways, and provides audit trails and supports e-signatures to meet regulatory requirements;

Saba Learning Commerce: Provides support

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
