# **Abstracts**

SAES Getters SpA Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between SAES Getters SpA and its competitors. This provides our Clients with a clear understanding of SAES Getters SpA position in the <u>Computers and Electronic Equipment</u> Industry.

The report contains detailed information about SAES Getters SpA that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for SAES Getters SpA. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The SAES Getters SpA financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes SAES Getters SpA competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SAES Getters SpA business.

# About SAES Getters SpA

SAES Getters S.p.A. engages in the development, manufacturing and marketing of getters and other components for displays and other industrial applications, as well as in the gas purification industry. The company also operates in the field of advanced materials, particularly in the development of shape memory alloys, getters for microelectronic and micromechanical systems and optical crystals.

# Units

The company operates through four units: Information Displays, Industrial Applications, Shape Memory Alloys and Advanced Materials.

Information Displays Business Unit

Liquid Crystal Displays Business: For the television set, monitor and liquid crystal display industry, SAES Getters develops technologies that are considered strategic for maintaining the vacuum and for absorbing harmful gases in the cold cathode fluorescent lamps for the LCD's displays back-lighting.

Cathode Ray Tubes Business: SAES Getters engages in the production and supply of

getters used to maintain vacuum conditions in cathode ray tubes for color televisions and monitors.

Industrial Applications Business Unit

Lamps Business: SAES Getters engages in the supply of getters and metal dispensers for lamps. It also engages in the development of mercury dispensers with a low environmental impact.

Electronic Devices Business: The Electronic Devices Business provides technological solutions to a range of markets, including the aeronautical, medical, industrial, security and defense sectors. The products developed are employed in various devices, such as night vision devices, infrared seeking devices, X-ray tubes and laser gyroscopes. The Electronic Devices Business includes getter solutions for vacuumthermal insulation for solar collectors.

Vacuum Systems & VacuumThermal Insulation Business: SAES Getters solutions for vacuum thermal insulation include NEG products for cryogenic applications and vacuum flasks, as well as vacuum insulating panels whose main use is for refrigerated transport containers.

Semiconductors Business: Through the subsidiary SAES Pure Gas, the company offers a range of purifiers for bulk gases and special gases, as well as vacuum pumps that can be used directly inside process rooms. The range of SAES Getters purifiers, which covers flows required and gases normally used in the processes involving the production of semiconductors, represents the market standard as regards the technology used, the totality of impurities removed and the lifespan of the purifiers.

#### Shape Memory Alloys Business Unit

Shape Memory Alloys (SMA) Business: SAES Getters produces shape memory alloy components, a family of materials characterized by super elasticity and by the property of assuming predefined forms when subjected to heat treatment.

Advanced Materials Business Development Unit

Getters per MEMS: SAES Getters has developed solutions that involve the use of thin film getters.

Optoelectronic Materials: The product line includes optical crystals for the electronic devices, industrial lasers, and scintillator markets.

**Other Flat Panels** 

SAES Getters offers getters and dryers that can be used in developments in the flat panel industry, among which Field Emission Display (FED) and Organic Light Emitting Diodes (OLED).

### Significant Events

In 2008, the company acquired Memry Corporation, which engages in the design, engineering, development and manufacturing of medical devices and other industrial applications of Nitinol (nickel-titanium) alloys. It also acquired the SMA division of Special Metals Corporation, which supplies shape-memory alloys for the biomedical industry and content applications.

In February 2009, the company sold the activities belonging to Putnam Plastics, the polymer division of the indirectly controlled company Memry Corporation.

History

SAES Getters S.p.A. was founded in 1940.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

# **ANALYSIS FEATURES**

#### **SWOT Analysis**

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

#### **Enhanced SWOT Analysis**

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

#### **PESTEL Analysis**

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

# IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

#### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

#### **VRIO** Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources Financial

Physical

Technological

Organizational

Intangible resources Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
