Abstracts

SafeStitch Medical, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between SafeStitch Medical, Inc. and its competitors. This provides our Clients with a clear understanding of SafeStitch Medical, Inc. position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about SafeStitch Medical, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for SafeStitch Medical, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The SafeStitch Medical, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes SafeStitch Medical, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SafeStitch Medical, Inc. business.

About SafeStitch Medical, Inc.

SafeStitch Medical, Inc., a development stage medical device company, focuses on the development of medical devices that manipulate tissues for obesity, gastroesophageal reflux disease (GERD), hernia formation, esophageal obstructions, Barrett's Esophagus, upper gastrointestinal bleeding, and other intraperitoneal abnormalities through endoscopic and minimally invasive surgery.

Products

SMART Dilator

SMART Dilator has a handle that changes from green to yellow and then to red, providing the physician a visual indicator of how close he or she is to the recommended two pound limit. Additionally, the SMART Dilator handle locks in place when the force applied to the dilator exceeds 2.5 pounds of pressure. The company received FDA clearance to market the SMART Dilator as a Class II device in February 2009.

Bite Blocks

Standard Bite Block: The company's Standard Bite Block provides a level of protection

as it is less easily expelled from the mouth. The Standard Bite Block is designed with a bigger lip and slightly different aperture than other bite blocks on the market.

Airway Bite Block: The Airway Bite Block contains a built-in airway that assists breathing in patients with larger tongues or smaller throats, usually because of obesity, during an endoscopic procedure. The Airway Bite Block was also tested following Institutional Review Board (IRB) approval at Creighton University Medical Center in 2008. The Airway Bite Block would come in two sizes.

Product Candidates

The company's initial product candidates focus on obesity and obesity-related conditions, as well as other intraperitoneal abnormalities, which often may be treated by bariatric surgery.

Intraluminal Gastroplasty Device for Obesity and GERD (Gastroplasty Device)

Gastroplasty Device consists of a set of instruments designed to perform incision-less, endoscopic surgery by introduction through the mouth and esophagus.

The Amid Hernia Stapler

The company is in the process of developing the Amid Hernia Stapler in cooperation with the originator of the Lichtenstein Hernia Repair. This stapler would utilize non-absorbable titanium staples for the repair of inguinal or groin hernias. The staples are used to fix mesh in place, which helps prevent the recurrence of a hernia.

Barrett's Excision and Ablation Device for Treatment and Diagnosis (Barrett's Device)

The Barrett's Device is designed to assist in both the diagnosis of and treatment of Barrett's Esophagus. The Barrett's Device allows the mucosa to be suctioned, sliced off and tested. The device also allows for cauterization of the affected area.

T Fasteners for Upper GI Bleeding (T Fastener Gun)

The T Fastener Gun delivers small metal fasteners at the end of an endoscope. T Fastener Gun can provide full-thickness stomach wall suturing for control of gastric bleeding. The T Fastener Gun is in an early stage of development and has undergone in vivo and ex vivo animal studies.

Novel Devices for Natural Orifice Transluminal Endoscopic Surgery (NOTES)

Natural Orifice Transluminal Endoscopic Surgery or NOTES is a method of operating in the abdominal cavity without making an incision in the abdominal wall. This surgery is also referred to as NO SCAR surgery. The natural orifices used in this type of procedure are the mouth and the rectum and, in females, the vagina. NOTES includes surgeries for gallbladder removal, appendectomy, tubal ligation, removal of intestinal and reproductive organ cancer and hernia repair, all through the gastric, rectal or vaginal walls.

Competition

The company's competitors include USGI Medical, TOGa devices from Satiety and StomaphyX and EsophyX from Endo Gastric Solutions, Inc. with respect to Gastroplasty Device; USGI Medical and Medigus, Ltd. with respect to GERD Device; Olympus Medical Equipment Services America, Inc. and BARRX Medical, Inc. with respect to Barrett's Device; Olympus and Wilson Cook with respect to gastrointestinal bleeding; Bard, LLC, ConMed Corporation, U.S. Endoscopy, Omni Medical Supply, Inc. and Olympus with respect to bite blocks; and Boston Scientific Corporation, Cook Medical Supply, Inc., Miller Medical Specialties, U.S. Endoscopy and The Rush Incorporated with respect to dilator.

History

SafeStitch Medical, Inc. was founded in 2005.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
