This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes SAVVIS, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SAVVIS, Inc. business.

About SAVVIS, Inc.

SAVVIS, Inc. provides information technology, or IT, services including cloud services, managed hosting, managed security, colocation, professional services, and network services.

The company's suite of products can be purchased individually, in various combinations, or as part of a total or partial outsourcing arrangement. Its colocation solutions meet the specific needs of customers who require control of their physical assets, while its managed hosting solution offerings provide customers with access to services and infrastructure without the upfront capital costs associated with equipment acquisition.

Services

Hosting Services provide the core facilities, computing, including cloud services, data storage, security and network infrastructure on which to run business applications. The company manages 28 data centers located in the United States, Europe, and Asia with approximately 1.43 million square feet of gross raised floor space. Its hosting services are comprised of colocation and managed hosting and allow customers to choose which parts of their IT infrastructure they own and operate.

Colocation is designed for customers seeking data center space and power for their server and networking equipment needs. The company's data centers provide customers worldwide with a purpose-built location for their IT equipment.

Managed Hosting Services provide a solution for a customer's IT infrastructure and network needs. The company offers assistance and consultation in security for network and hosting environments, virtualization, web-based applications, business recovery, software as a service, program management, infrastructure, and migration.

Dedicated Hosting provides customers with managed hosting services on hardware and software that is isolated to a single customer.

Utility Computing and Storage provides customers with an available, secure applications platform that delivers scalability of an entire range of IT infrastructure.

Network Services are comprised of managed network services, including managed IP VPN, High Speed Layer-2 VPN and the services marketed under WAM!NET brand; hosting area network, or HAN; and bandwidth services.

Managed IP VPN service is a fully managed, end-to-end solution that includes hardware, management systems, and operations to transport an enterprise's voice, video and data applications at corresponding quality-of-service levels.

High-Speed Layer-2 VPN uses metro Ethernet ring capabilities to provide access between connected nodes, which include data centers, carrier hotels for internet carrier diversity, or financial market data exchanges.

WAM!NET Services provide a shared infrastructure tied to applications that streamline process and workflow around the creation, production and distribution of digital media and marketing content.

Hosting Area Network is a network that provides high speed Internet connectivity for hosting and cloud customers located in the company's data centers, along with value-added services such as load balancing and network-based firewalls.

Bandwidth Services are provided to enterprises and wholesale carrier customers. The company offers Internet services in the United States, Europe, and Asia that are managed, unmanaged, or integrated with its IP VPN.

Customers

The company provides services to customers across all industries including the financial services, media and entertainment, software, and government sectors.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
