The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of SCANA Corp. business.

About SCANA Corp.

SCANA Corporation, a holding company, engages in the generation and sale of electricity to wholesale and retail customers in South Carolina and in the purchase, sale, and transportation of natural gas to wholesale and retail customers in South Carolina, North Carolina, and Georgia. The company also conducts other energy-related businesses and provides fiber optic communications in South Carolina.

Segments

Regulated Utilities

The Regulated Utilities segment includes the company's subsidiary, South Carolina Electric & Gas Company (SCE&G), which is engaged in the generation, transmission, distribution and sale of electricity to approximately 655,000 customers and the purchase, sale and transportation of natural gas to approximately 310,000 customers (each as of December 31, 2009). SCE&G's electric service territory extends into 24 counties covering approximately 17,000 square miles in the central, southern and southwestern portions of South Carolina. Resale customers include municipalities, electric cooperatives, other investor-owned utilities, registered marketers and federal and state electric agencies. Primary industries served by SCE&G include chemicals,

educational services, textile manufacturing, paper products, food products, lumber and wood products, health services, food, and retail stores.

This segment also includes South Carolina Generating Company, Inc. (GENCO), owns Williams Station and sells electricity solely to SCE&G. Its subsidiary, South Carolina Fuel Company, Inc. (Fuel Company), acquires, owns and provides financing for SCE&G's nuclear fuel, fossil fuel, and emission allowances.

In addition, the segment includes Public Service Company of North Carolina, Incorporated (PSNC Energy), which purchases, sells, and transports natural gas to approximately 473,000 residential, commercial and industrial customers (as of December 31, 2009). PSNC Energy serves 28 franchised counties covering 12,000 square miles in North Carolina. The industrial customers of PSNC Energy include manufacturers and processors of automobiles, pharmaceuticals, biotechnicals, chemicals, ceramics, food products, steel and non-woven textile, and kindred products.

This segment also includes its subsidiary, Carolina Gas Transmission Corporation (CGT), operates as an open access, transportation-only interstate pipeline company. CGT operates in southeastern Georgia and in South Carolina and has interconnections with Southern Natural at Port Wentworth, Georgia and with Southern LNG, Inc. at Elba Island, near Savannah, Georgia. CGT also has interconnections with Southern Natural in Aiken County, South Carolina, and with Transco in Cherokee and Spartanburg counties, South Carolina. CGT's customers include SCE&G (which uses natural gas for electricity generation and for gas distribution to retail customers), SEMI (which markets natural gas to industrial and sale for resale customers, primarily in the Southeast), other natural gas utilities, municipalities, county gas authorities, and industrial customers primarily engaged in the manufacturing or processing of ceramics, paper, metal, food, and textiles.

Non-regulated Businesses

The Non-regulated Businesses segment includes the company's subsidiary, SCANA Energy Marketing, Inc. (SEMI), which markets natural gas, primarily in the southeast, and provides energy-related risk management services. SCANA Energy, a division of SEMI, sells natural gas to approximately 455,000 customers (as of December 31, 2009) in Georgia's natural gas market.

This segment also includes SCANA Communications, Inc. (SCI), which provides fiber optic communications, ethernet services and data center facilities and builds, manages

and leases communications towers in South Carolina, North Carolina, and Georgia. SCI owns and operates a 500-mile fiber optic telecommunications network and ethernet network and data center facilities in South Carolina. Through a joint venture, SCI has an interest in an additional 2,280 miles of fiber in South Carolina, North Carolina, and Georgia. SCI also provides tower site construction, management and rental services in South Carolina and North Carolina. In addition, the segment includes ServiceCare, Inc., which provides service contracts on home appliances and heating and air conditioning units.

History

SCANA Corporation was founded in 1924.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
