Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Seacor Holdings Inc. business.

About Seacor Holdings Inc.

SEACOR Holdings Inc. engages in owning, operating, investing in, and marketing equipment, primarily in the offshore oil and gas, industrial aviation and marine transportation industries worldwide.

Segments

The company's operations are divided into six main business segments: Offshore Marine Services; Marine Transportation Services; Inland River Services; Aviation Services; Environmental Services; and Commodity Trading and Logistics. The company also has activities that are referred to as other, which primarily includes Harbor and Offshore Towing Services, various other investments in joint ventures and lending and leasing activities.

OFFSHORE MARINE SERVICES

The Offshore Marine Services segment operates a fleet of support vessels primarily servicing offshore oil and gas exploration, development, and production facilities worldwide. Vessels in this service are employed to deliver cargo and personnel to offshore installations, handle anchors for drilling rigs and other marine equipment,

support offshore construction and maintenance work, provide standby safety support and emergency response services. The Offshore Marine Services supports projects, such as well stimulation, seismic data gathering, and offshore accommodation. Offshore Marine Services also offers logistics services in support of offshore oil and gas exploration, development and production operations, including shorebased, marine transport, and other supply chain management services.

Markets

The United States: As of December 31, 2009, 62 vessels were operating in the U.S. Gulf of Mexico, including 33 owned, 24 leased-in, 3 joint ventured, and 2 pooled. Offshore Marine Services' expertise in this market is deepwater anchor handling with its fleet of anchor handling towing supply (AHTS) vessels, and exploration and production support with its fleet of crew and mini-supply vessels.

Africa, primarily West Africa: As of December 31, 2009, 26 vessels were operating in West Africa, including 18 owned, 2 leased-in, 4 joint ventured, and 2 managed. Offshore Marine Services operates primarily in Angola, servicing multi-year projects for major oil companies. The other vessels in this region operate from ports in Nigeria, the Republic of the Congo, Cameroon, Gabon, Equatorial Guinea, and South Africa.

United Kingdom, primarily North Sea: As of December 31, 2009, 25 vessels were operating in the North Sea, including 24 owned and one joint ventured. The North Sea fleet provides standby safety and supply services.

The Middle East: As of December 31, 2009, 22 vessels were operating in the Middle East region, including 16 owned, 1 leased-in, 2 joint ventured, and 3 managed. Offshore Marine Services' vessels operating in this area generally support activities in countries along the Arabian Gulf and Arabian Sea, including the United Arab Emirates, Qatar, Saudi Arabia, and India.

Asia: As of December 31, 2009, eight vessels were operating in Asia, including six owned and two joint ventured. Offshore Marine Services' vessels operating in this area generally support exploration programs. Offshore Marine Services' major markets in this area are Vietnam and Indonesia.

Mexico, Central, and South America: As of December 31, 2009, 22 vessels were operating in Mexico, Central and South America, including 14 owned and 8 managed. Offshore Marine Services' primary markets in this region are Brazil, Argentina, and

Mexico.

Customers

Offshore Marine Services' principal customers are major integrated oil companies, large independent oil and gas exploration and production companies, and emerging independent companies

MARINE TRANSPORTATION SERVICES

The Marine Transportation Services segment owns a fleet of eight U.S.-flag product tankers, providing marine transportation services for petroleum products and chemicals moving in the U.S. domestic coastwise trade.

Markets

Petroleum Product Transportation: In the domestic energy trade, oceangoing vessels transport fuel and other petroleum products primarily from refineries and storage facilities along the coast of the U.S. Gulf of Mexico to utilities, waterfront industrial facilities and distribution fa

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
