Abstracts

Seahawk Deep Ocean Technology, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Seahawk Deep Ocean Technology, Inc. and its competitors. This provides our Clients with a clear understanding of Seahawk Deep Ocean Technology, Inc. position in the Industry.

The report contains detailed information about Seahawk Deep Ocean Technology, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Seahawk Deep Ocean Technology, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Seahawk Deep Ocean Technology, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main

financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Seahawk Deep Ocean Technology, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Seahawk Deep Ocean Technology, Inc. business.

About Seahawk Deep Ocean Technology, Inc.

Seahawk Deep Ocean Technology, Inc (the Company) was formed under the laws of the State of Colorado in 1986, for the purpose of creating a corporate vehicle to seek and acquire a business opportunity. The Company is an oceanographic service company that is involved in deep-water search, survey and recovery operations. The Company serves as the general partner for limited partnerships that were formed for the purpose of raising money to search for and locate shipwrecks.

The Company owns and operates a variety of sub-ocean equipment including an 83 foot survey vessel, ROVs (Remotely Operated Vehicles), and other specialized search and recovery equipment which enables the Company to locate, photograph and retrieve items lost on the seabed in deep water. The Company also seeks opportunities where it can lease its equipment to others and generally act as an underwater contractor.

The Company has formed three limited partnerships with Seahawk I, Ltd., Seahawk II, Ltd. and Eagle Partners, Ltd for the purpose of funding the search for deep-water shipwrecks in pre-designated areas. The partnerships formed by the Company and for

which the Company serves as the general partner are engaged in the business of attempting to locate, identify, recover and market the cargoes and artifacts associated with one or more shipwrecks in a specific area. The Company, on the other hand, provides to the partnerships the data, manpower and equipment necessary for the partnerships to carry out this business purpose. The Company is also engaged in the business of locating, identifying, recovering and marketing the cargoes and artifacts associated with shipwrecks on its own behalf and for others on a world wide basis.

Shipwreck and Treasure Museum

The Company intends to own, develop and operate theme attractions to be known as Shipwreck and Treasure Museums. It is intended that such attractions will display the artifacts and products recovered by the Company or the Limited Partnerships, recreate the background and actual mission of the recovery crew on each discovery, and create a gift shop that will sell artifacts and products relating to the artifacts.

South American Project

On June 1, 1994, the Company signed an Agreement for Consulting Services with Remarc International, Inc., a Colorado corporation controlled by two former officers and directors of the Company, John Morris and Gregory Stemm. The Agreement provides that Remarc will, at its own expense, seek to obtain for the Company a permit from the appropriate government to search for and salvage the particular shipwreck involved in the South American Project.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
