Such information creates your awareness about principal trends of Security Federal Corp. business.

About Security Federal Corp.

Security Federal Corporation operates as the holding company for Security Federal Bank, which provides various banking products and services.

The bank serves the counties of Aiken, Richland, and Lexington, South Carolina, and Columbia County, Georgia through its 13 full service branch offices located in Aiken, North Augusta, Graniteville, Langley, Clearwater, Wagener, Lexington, Columbia, and West Columbia, South Carolina, and a branch office in Columbia County, Evans, Georgia.

The bank's wholly owned subsidiary, Security Federal Insurance, Inc., is an insurance agency offering auto, business, health and home insurance, and premium finance.

Lending Activities

The bank's principal lending activities are making loans on commercial real estate and one-to-four family residential real estate. It originates fixed rate residential real estate loans for sale in the secondary market and adjustable rate mortgage loans to be held in its portfolio. It also originates construction loans on single family residences, multi-family dwellings and commercial real estate, and loans for the acquisition, development, and

construction of residential subdivisions and commercial projects. It originates consumer loans and commercial business loans.

Commercial Business and Commercial Real Estate Loans: The commercial business loans originated by the bank are primarily secured by business equipment, furniture and fixtures, inventory, and receivables or are unsecured. The commercial real estate loans originated by the bank are primarily secured by non-residential commercial properties, churches, hotels, residential developments, single family construction loans to builders for speculative or pre-sold homes, lot loans to builders, income property developments, and undeveloped land. The multi-family commercial real estate loans originated by the bank are primarily secured by commercial residential properties, including apartment complexes, condominiums or townhouses, and loans for acquisition and development of, or improvements to multi-family residential properties.

Consumer Loans: The bank originates consumer loans for any personal, family or household purpose, including the financing of home improvements, loans to individuals for residential lots for a future home, automobiles, boats, mobile homes, recreational vehicles, and education. It also makes consumer first and second mortgage loans secured by residences. Home equity loans are secured by mortgage lines on the borrower's principal or second residence. The bank also makes secured and unsecured lines of credit available.

Investment activities

As of March 31, 2010, the bank's investment portfolio included the Federal Home Loan Bank (FHLB) securities, Federal Farm Credit Bank securities, Fannie Mae bonds, Freddie Mac bonds, Small Business Administration bonds, taxable municipal bonds, and equity securities.

Deposits

The bank attracts both short-term and long-term deposits from the general public by offering various account types and rates. It offers regular savings accounts, checking accounts, various money market accounts, fixed interest rate certificates with varying maturities, jumbo certificates of deposit (Jumbo CDs), and individual retirement accounts.

History

Security Federal Corporation was founded in 1922.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
